**LEWIS' 98 PERCENT LYE**

POWDERED AND PREPARED

(PATENTED)

The strongest and purest Lye made. Unlike other Lye, it does not burn the skin, and is packed in a can with removable lid, the contents are always ready for use. Will make the best perfume without boiling. It is the best for cleaning waste pipes, disinfected sinks, closets, washing bottles, paint, trees, etc.

PREPARED BY F. H. HILLIOWAY, Gen. Agt., Phila., Pa.

## AT HARRISON'S HOUSE.

The Infanta Takes Breakfast With Chicago's Mayor.

SHE MEETS PROMINENT PEOPLE.

The World's Congress on Temperance Discusses the Liquor Problem From Different Points of View—Doctors Debate the Scientific Phase of the Habit.

CHICAGO, June 7.—This morning the Infanta Eulalie was the guest of Mayor Harrison at breakfast at his home on Ashland avenue. This breakfast was an official affair. Not more than 18 or 20 persons were at the table. These included the members of the infanta's suite, President Higginbotham, Mrs. Higginbotham, President Palmer, Potter Palmer, Mrs. Potter Palmer and other ladies and gentlemen who hold official positions in connection with the World's fair. During the drive to Mayor Harrison's home the infanta was escorted by mounted police, instead of United States soldiers. After the breakfast the infanta held a short reception to well-known citizens of Chicago and the World's fair officials. This was not in any sense a public reception. Mayor Harrison did not ask the infanta to meet more than the 50 or 60 persons bidden by invitation.

THE FLOOR OF MANUFACTURES BUILDING FROM THE ELEVATOR LANDING.

The world's congress on temperance divided itself into two branches and discussed the burning question from a dozen points of view. The assemblage in the hall of Washington, and which was presided over by Ex-Governor E. H. Goodell of New Hampshire, took up the legislative and political aspect of the question. Under this head the following papers were presented and discussed: "Principal and Method in Temperance Reform," Rev. Dr. Herrick Johnson; "Ought Women to Vote Concerning the Traffic and Legislation," Mrs. Mary A. Livermore; "The Duty of Church Members in Social Reform," Rev. Joseph Cook of Boston. Rev. Dr. Hanson of this city spoke upon the "Relation of Law to Gospel in Temperance Reform." In the Hall of Columbus the doctors had everything to themselves and the drink traffic was considered from a scientific point of view. Numerous arguments and examples showing the physical benefits of total abstinence were presented by B. W. Richardson, Fellow of the Royal Society of London, while Dr. A. Forel of Switzerland discussed learned upon the effect of alcoholic intoxication upon the human brain and its relations to the theories of heredity. Dr. J. B. Dunn of Boston discussed the question whether beer and light wines were to be encouraged or against the stronger distilled liquors, and while depreciating the use of alcoholic liquor in any form, answered generally in the affirmative. Dr. N. S. Davis of this city arrayed against alcohol the latest verdict of science and made out a decidedly strong case against exhilarating decoctions.

Examining the Borden Premises.

FALL RIVER, Mass., June 7.—The Borden jury arrived in the city from New Bedford. There was no crowd to speak of at the station, although their coming had been previously announced. The jury members were taken at once to the house. Plans of the premises and surroundings were brought along. The jury walked to the Borden house and were admitted with the respective counsel and examined the premises carefully.

Committed in Pennsylvania.

PRAGUE, June 7.—A Pole named Smetana, who is in prison in this city on charge of robbery, has confessed that he murdered a Pole named Bolkowski in Pennsylvania, United States of America, about three years ago and rolled the murdered man of \$210. After committing the murder Smetana, according to his confession, fled to Europe, and another Pole was convicted of the crime and sentenced to imprisonment as a penalty.

Harvard Won't Be Represented.

BOSTON, June 7.—Contrary to public reports it is improbable that Harvard will be represented in any way at the coming baseball tournament in Chicago. Overtures were made to Harvard to attend, but the expenses are to be greater than were at first supposed and now nothing is being done at Harvard in the matter.

Expect the Duke Back.

WASHINGTON, June 7.—The programme of the movements of the Duke of Veragua in the future as telegraphed from Chicago is said at the Spanish legation in this city to be incomplete. Before the duke sails from New York they expect him to come to Washington and make his adieux to the president and Mrs. Cleveland.

Warm Weather in Gotham.

NEW YORK, June 7.—New Yorkers were unprepared for the sudden advent of the hot wave, and in consequence there has been much suffering. The thermometer reached 92 deg. and was still climbing. In this city and Brooklyn a number of prostrations from the heat were reported.

## THE CARPENTER FIRED.

But the Man Responsible for the Work Goes Free.

STREUBENVILLE, O., June 7.—Last Sunday a new floor was laid in Ben Mettenberger's saloon. Two ministers, Rev. Dr. Haskill of the M. E. church and Rev. Mr. Milligan of the U. P. church, went before the mayor and charged Mettenberger with violating a state law against Sunday work.

The mayor objected to recognizing an affidavit against Mettenberger, declaring he could not be held for it because he did not perform common labor himself on Sunday. He insisted that the charge be made against John Mulcahy, the carpenter who did the work. The ministers did not know Mulcahy in the matter and declared the mayor ought to make the information. The mayor said it was the marshal's place to do that, but the marshal declared he had not the authority. Then the ministers got mad and read the riot act to the officials. Finally the marshal made the information and Mulcahy was fined.

Narrowly Escaped Lynching.

DAYTON, O., June 7.—George Grady, a farm hand, 20 years old, made a daring attempt to commit an outrage on Laura Woodward, 13 years old, near a schoolhouse south of Blavertown. Grady is a simple-minded fellow, but was not regarded as vicious. Rescuers hastened to the scene and took charge of the would-be ravisher. Grady showed no fear, but merely grinned in response to the angry threats. The news of the affair quickly spread, and farmers with shotguns rapidly converged at the schoolhouse. A constable managed to get hold of the fellow, however, and hustled him off to a magistrate, where Grady was detained long enough to get commitment papers, when he was speeded to this city and lodged in jail. The prompt action of the constable averted a lynching.

Beaten by His Wife.

COLUMBUS, O., June 7.—William Cryder of Sixth and Main streets has been suspecting his wife of unfaithfulness for some time, but could get no positive evidence against her. She left home ostensibly to call upon a neighbor lady. Cryder went to the neighbor's later and learned his wife had not been there. He found her with another woman and two men drinking in a "ladies' parlor" at Flanagan's saloon, Washington avenue and Main street. Mrs. Cryder was drunk. Cryder flew into a rage and dragged her from the place. At the door she grabbed a heavy-handled umbrella from under her arm and beat him over the nose. Face and neck so severely that he fell unconscious in the street. She then fled and he was taken home by a friend.

Prominent Capitalist Dead.

COLUMBUS, O., June 7.—Isaac Morton, a retired capitalist and at one time probably the best known railroad man in the state, died at his residence here of heart disease. He was 83 years old. Mr. Morgan was one of the projectors of the Cleveland and Marietta railroad. He became successively the president, vice president and superintendent of the Cleveland and Marietta, and was one of the three trustees of that line with Cyrus W. Field and John Peyton. He was also largely interested in the Baltimore and Ohio six years ago. He was the Democratic candidate for congress in the Sixteenth district, and made a gallant but hopeless run against the overwhelming Republican majority. He was well known in railroad and financial circles in Cincinnati.

On Trial for Arson.

STREUBENVILLE, O., June 7.—The trial of William Byrne of Pittsburgh has begun again. On the first trial the jury disagreed. Byrne is on trial for arson, and his partner, John Rupp, was indicted for firing his saloon on the night of Jan. 15 to collect \$2,500 insurance, which he had placed on the fixtures, being greatly in excess of their value. His partner, Rupp, was convicted at the last term of court. New attorneys will be employed in this case. Ex-Prosecuting Attorney Gregg will assist the state, and Colonel Anderson, a noted criminal lawyer of Youngstown, will assist the lawyers for the defense.

THE RUNS CONTINUE.

Chicago Banks Still Paying Off Excited Depositors.

CHICAGO, June 7.—The excitement among savings banks depositors continues. The banks opened promptly on time, and the labor of paying off accounts began with a zest. Fully 500 depositors were in line in front of the Illinois Trust and Savings bank, and a large detail of police was necessary to keep order. President Mitchell was on hand early, and said that the bank had all the money it needs to meet all deposits promptly. It has \$9,000,000 call loans out which can be realized on in a short time.

A Manitowoc, Wis., dispatch says: The state bank of Manitowoc has failed. There has been a run on the bank for three weeks and the bank succumbed. C. C. Barnes, the president, has pledged all his personal property to secure the depositors.

A special from Defiance, O., says that the savings bank of Andrew Sauer, at Defiance, has failed.

Erastus Wiman's Finance.

NEW YORK, June 7.—The direct liabilities of Erastus Wiman, as scheduled in the office of the clerk of Richmond county, S. I., are stated at \$591,000. The contingent liabilities are \$315,000. The assets included in the schedule are stated to be nominally worth \$900,000, but as the amount turned over does not include the bonds hypothecated nor the real estate which the trustees have in hand, the actual amount transferred only represents about \$25,000.

He Beat His Wife.

PHILADELPHIA, June 7.—Charles Bickerton of 748 McKean street has been remanded to prison by Magistrate Palmer to await the action of the coroner for the murder of his wife, Lillian. The couple had been separated for some time, and on an unavailing meeting each other one evening last week, words ensued, and he beat her unmercifully. Her relatives claim her death resulted from the beating.

## EDWIN BOOTH'S DEATH.

The Great Actor Expired Early This Morning.

STORY OF HIS FAMOUS CAREER.

He Obtained Success After Many Hardships—His Father a Noted Actor—The Assassination of Lincoln Engulfed Him in a Sea of Wretchedness.

NEW YORK, June 7.—The death of Edwin Booth, the great actor, occurred this morning at 1:15, at the Players' club. Early in the evening his relatives were called in and were at his bedside when he gasped his last breath. The evening of Monday, Sept. 10, 1849, saw Edwin Booth's first appearance on the stage. It was at the Boston museum, and he played the part of Tresselt in "Richard III." his father, the great Junius Brutus Booth taking the leading role. Booth's last appearance on any stage was at an afternoon performance of "Hamlet" at the Brooklyn Park theater, Saturday, April 4, 1891. Booth's acting was far from strong—the effects of his advancing age and failing powers were plainly visible—yet he was given a veritable ovation by the audience.

EDWIN BOOTH.

Edwin Booth was born in Harford county, about 20 miles from Baltimore, Nov. 15, 1833. His father, Junius Brutus Booth, was 37 years old then, and in the zenith of his fame as an actor. The mother had been, it is said, a flower girl in Covent Garden, London. She was a beautiful woman. There were seven children, of whom John Wilkes and Edwin were the only two to achieve fame on the stage. In 1852 Booth went to California and then to Australia and the Sandwich Islands. He endured many hardships, but when he returned to San Francisco, he received an ovation. Then he returned to New York, and was fairly on the road to fame. It was about this time that he met Mary Devlin, a southern girl of great beauty and an actress of extraordinary talent. They married in New York July 7, 1860. She immediately retired from the stage. They were ideally happy. She died in 1863. Then he abandoned the profession, after a run in the Winter Garden theater, New York, which established him as the greatest living American actor.

In 1864-5 Booth again appeared in New York as Hamlet. April 17 of the latter year the assassination of President Lincoln by John Wilkes, his brother, startled the world and engulfed him in a sea of grief and wretchedness. He quit the stage on the very night of the tragedy, intending never to return to it, but the importunities of his friends were so earnest that Jan. 30, 1866, he again stepped upon the stage. His appearance behind the footlights was the signal for nine great cheers which fairly shook the theater. But never since that fatal 17th of April has he played a professional engagement in Washington.

After his re-entry into public life in 1860 Booth was the central figure of a series of magnificent productions at the Winter garden. When that theater was destroyed by fire he erected the famous Booth's theater in which he lost nearly \$1,000,000. This vast indebtedness he paid, dollar for dollar, with interest. The death of his second wife was the culmination of a long series of domestic anxieties. He made another and phenomenally successful professional visit to England and also scored a triumph in Germany. His tours with Lawrence Barrett began during the season of 1887-88. From both a financial and artistic standpoint they were wonderfully satisfactory. The profits on one season were more than \$300,000.

Later Mr. Booth had lived in Lakewood, N. J., where he owned a beautiful home. It was there that the general breakdown, which eventuated in his death, first manifested itself. Booth was well off and is believed to have left a fortune of more than \$500,000.

Scandal Love's Foe.

UPPER SANDUSKY, O., June 7.—What promised to be a very racy divorce trial was settled, just when a great crowd was in the courtroom prepared to hear it. The case was that of Captain J. C. Dry, a leading citizen and commander of the G. A. R., against Belle Dry. The petition, answer and cross petition bubbled with interesting features, and it was a sore disappointment to the crowd that a settlement had been reached. The captain gets a divorce, and the defendant her maiden name, thirty acres of land and \$600.

Withdraws From the Trust.

CINCINNATI, June 7.—There is considerable excitement in brokerage circles here over whisky trust rumors. Despite denials, it is quite certain that Johnson & Co. of this city have withdrawn from the trust. It is the largest house in America and means a terrible blow to the trust.

Cleveland's Action Approved.

NEW YORK, June 7.—Local bankers and financiers here warmly approve of President Cleveland's announcement of his intention to call an extra session of congress to deal with the silver question.

## THE CARAVELS EN ROUTE.

They Leave New York on Their Way to Chicago.

NEW YORK, June 7.—The three Spanish caravels, which have been anchored up the North river for the last six weeks, made a start for Chicago. They came down the river in tow of tug Triton. The three caravels were lashed together side by side. At Whitestone the United States cruiser Newark was lying in wait to convey the caravels. The Newark takes charge of the Santa Maria, the Iwarra of the Pinta and the Triton tows the Nina. The route is through Long Island sound, along the New England coast, around Nova Scotia and through the gut of Canso and Northumberland strait. The Newark will leave the caravels here and return to New York. They will proceed the remainder of the voyage through the great lakes to Chicago, under the care of the Iwarra and Triton. How long it will take them to accomplish this journey depends very much upon the weather, but if they are not detained by fog at the banks and off the mouths of the St. Lawrence the trip ought not to take more than a month.

## BLOUNT COMING ROUND.

He Now Approves of Ex-Minister Steven's Course.

A PLOT TO RESTORE THE QUEEN.

Claus Spreckels Said to Be Aiding Such a Scheme, Which is on Foot Among the Low Element of the White Citizens of the Hawaiian Islands.

SAN FRANCISCO, June 7.—The steamer Galile has arrived from Hong Kong and Yokohama via Honolulu, bringing advices from the latter place. It may be positively stated that Minister Blount has come heartily to approve of the revolution and probably justifies nearly all of the course of ex-Minister Stevens. He has never for an instant thought of restoring the ex-queen or causing it to be done, notwithstanding the general and persistent assertion of the royalists that he so intended. Whether he will recommend annexation is not clear. He may possibly take the grounds that it is undesirable on account of the large proportion of non-American population.

A royalist rumor is now unusually strong and positive that the ex-queen will be restored on June 11. The government is well advised of the existence of a definite conspiracy among the baser class of whites to carry out this plan. It seems evident that they have found some source of supplies. It is expected that Minister Blount will soon be prepared to proceed with negotiations looking toward a proclamation of a temporary arrangement leaving the way open for a treaty of annexation. There is some reason to believe that some correspondence on the subject has already passed between Blount and the government, which will probably give friendly consideration to such propositions as may be made from Washington.

Claus Spreckels returned a few days ago from his second visit to Maui in a violent temper at having been unable to bring the planters and other leading business men over to his plan of an independent government. Although he previously had no decided idea of restoring the monarchy, he now speaks of it as probable and has even threatened that it will come. He is in constant communication with the ex-queen and her chief adherents. It is nearly certain that the conspiracy is based upon the expectation of his support, which, if given, would render it extremely formidable in Honolulu. Spreckels has demanded the immediate payment of \$50,000 owed him by the government. In making the demand he said he did not consider that his plans for a republic had received proper consideration and he did not see why his money should be used to further the plans of his opponents.

Prominent Man Disappears.

BOSTON, June 7.—Hon. Moody Merritt, who for 34 years has been connected with the business interest of the city as a lawyer, street railway president, legislator and agitator for public improvement and reforms, has been absent from the city and his relatives and closest associates know nothing of his whereabouts. His private secretary asserts that there is nothing mysterious about the Mr. Merritt's absence from the city. He told his secretary he was going away for rest and would keep his destination secret to prevent being burdened with business cares.

The Drummers' Convention.

PEORIA, Ill., June 7.—About 1,000 traveling men are here to attend the convention. Receptions were given by the local organization, after which the convention assembled in the Grand opera house. The proceedings were opened by prayer. The speech of welcome was delivered by the mayor, and the presentation of a silver gavel to George S. McGraw, the national president, followed. The association reports \$28,000 in the treasury.

Whites Goes to Chicago.

WASHINGTON, June 7.—Assistant Secretary Willets of the agricultural department left for Chicago today, where he will supervise the completion of the exhibit of the department at the World's fair. While there he will also tender his resignation as chairman of the board of government exhibits, necessitated by the acceptance of his resignation as assistant secretary of agriculture.

Indian Claims Paid.

WASHINGTON, June 7.—The final payment of the Choctaw and Chickasaw Indians' claims, amounting to nearly \$2,000,000, ordered to be paid by Secretary Carlisle, has been made by the treasury department.

A Paper's Edition Seized.

BERLIN, June 7.—The police have seized and confiscated the edition of the periodical called The Socialist for some reason that has not been made known.

## THE NEWS OF DALTON.

A Varied Assortment of News from a Busy Town.

J. J. Wampler and wife, of Mt. Eaton, spent Sunday in our midst.

Dr. J. T. Her, our druggist, made a flying trip to Toledo Sunday, leaving here at 4:54 a. m. and returning at 10:32 p. m.

The Rev. Mr. Weltmer has been employed to preach here and at Mt. Eaton in the Presbyterian churches, and will move into the new parsonage, which has just been completed.

Mrs. A. E. Dauchy and family, of Massillon, are visiting with the former's parents, Mr. and Mrs. George Kosier.

Joseph McElhinney and wife left for their home in Lyons, Neb., last Saturday evening.

The Wheeling & Lake Erie railroad seems to want to extend its road south beyond where the rails are laid. On East Main street there is a car standing across the street.

The Goudy & Focke roller flour mill has commenced running day and night. An increased demand for the flour is the cause.

Mrs. John Leonard left for her home in Cleveland, Thursday, after a month's visit here.

The Dalton Fishing and Turtle Club is still in existence, and has commenced to make some good catches of turtle.

C. B. Feasel and E. F. Scott made a trip to Lodi, on Saturday, on their wheels.

The Democratic primary was held here last Saturday, and it was a lively one on who was to be the township committeeman here. Martin Schultz has been committeeman for a great many years. A new man appeared on the scene in the election of D. F. Cully over Schultz by a good majority.

Visiting Some Representative T  
Great State—Surprising Mr.  
With Hot Waffles—An Ince  
trating the Educational System

[Copyright, 1883, by Edgar W.

# THE McLAIN ASSIGNMENT.

PRECIPITATED BY GENERAL FINAN-  
CIAL DEPRESSION.

The J. H. McLain Co., and Frank C. Mc-  
Lain Turn Their Affairs Over to C. L.  
McLain and E. G. Willson—As Complete  
a Statement as is Obtainable Today.

CANTON, O., June 1.—Frank C. Mc-  
Lain made an assignment this morn-  
ing to Eugene G. Willson. This  
was almost immediately preceded by  
the assignment of the J. H. McLain  
Company and of J. H. McLain individ-  
ually, to C. L. McLain. These assign-  
ments are all believed to be attributa-  
ble to an excessive use of credit with-  
out sufficient capital, precipitated by  
the stringency of the money market.  
The liabilities of the J. H. McLain  
Company are roughly estimated at  
\$150,000, and the assets will aggregate  
at least \$200,000.

The assignment of J. H. McLain and  
of the J. H. McLain Company were  
hastened by the trouble in which  
Frank C. McLain became involved.  
The latter bought heavily, and two  
creditors pressing brought matters to  
a climax. His purchases were secured  
to the extent of eight or nine thousand  
dollars by the J. H. McLain Co. To  
protect them and with the hope of  
saving the J. H. McLain Co. Frank C.  
McLain gave a chattel mortgage on his  
entire stock. The J. H. McLain Co.,  
became responsible as endorser for  
Frank C. McLain, in the amount  
named. In addition to this loan, the  
J. H. McLain Co. had paper for about  
\$40,000 distributed among Canton  
banks, for which security was being  
demanded, the time limit being today.

As it was impossible to satisfy the  
more urgent of the creditors an as-  
signment for the benefit of all was de-  
termined upon.

Mr. C. L. McLain took charge as  
assignee at 10:30 this morning, and is  
unable at this time to make a state-  
ment at all comprehensive. It may be  
said, however, that help will be forth-  
coming, if, after an examination of the  
accounts, it promises to be effective.  
Whether the business will be carried  
on by the assignee depends upon the  
creditors. If it seems advisable to the  
assignee, and if the consent can be ob-  
tained of the majority of the creditors  
who hold three-fourths of the total  
amount of claims, this will be done.  
There are no preferred creditors.

The exact amount of Mr. McLain's  
paper held by the Massillon banks is  
\$4,875.

The J. H. McLain Company is a cor-  
poration, the stock of which is held  
entirely within the family of J. H.  
McLain. They manufacture heaters,  
brass goods, castings, and do a general  
machinist's business, employing there-  
in a large number of men and owning  
extensive works along the Ft. Wayne  
road.

Frank C. McLain is the eldest son of  
J. H. McLain, and established a retail  
merchandise business in Canton about  
a year ago, handling bicycles and  
house furnishing goods principally.

The unfortunate state of affairs has  
nearly prostrated the head of the con-  
cern, whose courage and energy in  
building up a trade and plant have  
been phenomenal, and who only yield-  
ed when financial conditions as broad  
as the country compelled him to do so.  
As it is, the assets show handsomely  
over the liabilities, if they can be real-  
ized upon to the extent estimated, and  
while it is too early to predict or even  
suggest what may be the outcome of  
present complications, it is sincerely  
hoped on all sides that successful ef-  
forts will be made to re-establish the  
business on some permanent basis.  
Nothing but the warmest sympathy is  
felt for Mr. McLain and all his sons  
in their difficulties.

## COURT HOUSE AND CANTON.

CANTON, June 1.—George Casper has  
commenced proceedings in the com-  
mon pleas court against Sheriff Kridler.  
Casper claims that the sheriff levied  
upon property owned by him for the  
payment of a promissory note in the  
sum of \$1,274, signed by Casper, which  
the latter claims is a forgery. The  
plaintiff prays for an extension of the  
time set for the sale.

The case of Isaac R. Sherwood against  
James J. Clark, in which the plaintiff  
sues for \$25,000, alleged to be due for  
injuries received in an assault made by  
the defendant, was filed yesterday.

Mary E. Oser has petitioned the  
common pleas court for a divorce from  
William F. Oser, charging the latter  
with gross neglect and failing to pro-  
vide for her for the past four years.  
Wann & Bow are the attorneys for the  
plaintiff.

The Union National bank, of Massil-  
lon, has commenced proceedings  
against the Miller Steam Pump Com-  
pany to recover \$697 due on a prom-  
issory note, made payable to J. H. Mc-  
Lain, and signed by the Steam Pump  
Company, the note having been in the  
possession of the bank before the as-  
signment of J. H. McLain. Willson  
& Day are the attorneys for the plain-  
tiffs.

Through the attorneys Day, Lynch  
& Day, William S. Masters has com-  
menced proceeding in the common  
pleas court against Lizzie Masters,  
praying for a divorce on the grounds  
of desertion. The plaintiff also asks  
for the custody of their 8 year old child  
John B. Masters.

Marriage licenses have been granted  
to M. E. McFarren and Laura Grove,  
George Lelansky and Hesterse E. Bau-  
hof, of Canton; Austin Quinn and Liz-  
zie Schiltz, of New Berlin; F. Willard  
Arnold and Fannie Upham, of Massil-  
lon.

Warren E. Russell has been appoint-  
ed administrator of the estate of Thos.  
H. Russell, of Massillon.

## REAL ESTATE TRANSFER.

Sugar Creek township, Lenhart Har-  
raw to C. Johnston, lots No. 90, 91, 92  
and 93, in Algiers addition, Wilmet  
\$100.

Massillon, first ward, Michael King

to Joseph P. King, lot No. 817. Joseph  
P. King to Mary J. King, lot No. 817.

Sugar Creek township, Ida Wells to  
M. J. Fisher and Alice Shatzer, lot No.  
20, in Shetler addition, \$440.

Massillon fourth ward—Emma Rig-  
ler, by administrator to Millicent  
Theis, lot No. 1732, \$325.

Perry township—William F. Ricks  
to Anthony Howella, lot No. 3, in Co-  
lumbian Heights, \$400.

Lawrence township, Samuel Bliler to  
Susanah M. Metzger, lots No. 70 and  
100, \$500.

Massillon third ward—Ellen Mong's  
heirs to Charles M. Russell, lot No. 55,  
\$1500.

Tuscarawas township, Olavinda A.  
Evans to John E. F. Morris, one acre,  
\$150.

Massillon third ward, Lawrence  
Claus to Nicholas Sterner, 1 acre,  
\$300.

Massillon first ward—S. Buckius  
heirs to C. F. Porter, lot No. 144, \$1200.

Francis Cassidy to Knights of Pyth-  
ias in trust to Lawrence Lodge, \$125.

Tuscarawas township—George Cassp  
to Jacob Culler, lot No. 10, \$809.

J. J. Maudru to Francis Cassidy, lot  
No. 36, in J. P. Burton addition.

Hattie Brenner to David Brenner,  
23 40-100 acres, \$100.

Lawrence Claus to Joseph Kraft, 1  
acre, \$300.

CANTON, June 3.—The W. & L. E.  
has commenced proceedings in court  
today against Samuel P. Borden  
and John C. Pepper, praying that  
an injunction be served on the defend-  
ants preventing them from erecting  
buildings, now under way of construc-  
tion, between the office of said company  
in their new yards and the W. & L. E.  
tracks. Sheriff Kridler served a tem-  
porary injunction on the defendants  
this morning.

The Cantons and Mansfields, of the  
Ohio and Michigan league, will play at  
Hampton park Sunday afternoon.  
Game called at 3:15.

Abraham Willard has brought suit  
against the city of Canton praying for  
judgment in the sum of \$300, alleged to  
be due for damage done to his property  
in Fourth street, by the construction  
of the city sewer plant.

Adam D. Metzger has been appointed  
administrator of John K. L. Swihart,  
of Perry township.

## REAL ESTATE TRANSFERS.

Massillon, first ward, John A. Shoe-  
maker to John Freedman, lots No. 1,058  
and 1,059, \$1,600.

Lawrence township, John J. Maudru  
to Francis Cassidy, lots No. 34 and 35.

## BIG VALUE FOR SIXTY CENTS.

Where is the Agent Who Made Gilt Edged  
Promises?

About one month ago a smooth  
tongued agent went from house to  
house in Massillon, selling "advertising  
tickets" issued by the "Progressive  
Portrait Studio and Art School," of  
Cincinnati. These tickets were sold  
for twenty five cents in spot cash, in  
return for which the agent took away a  
photograph of his subject, and agreed  
to copy the same, and furnish the  
copy, which was guaranteed to be "one  
\$5.00 life size portrait," on payment of  
35 cents additional for cost of materi-  
als. The extraordinary offer was  
made to introduce the goods, but  
strangely enough none of the \$5.00  
life size portraits have been delivered,  
although long since past due, and the  
people who paid the 25 cents spot cash  
for the "advertising tickets," are won-  
dering what has become of the agent.

Crying Babies  
Some people do not love Them. They  
should use the Gail Borden Eagle Brand  
Condensed Milk, a perfect infant food.  
A million American babies have been  
raised to man and womanhood on the  
Eagle Brand. Grocers and Druggists.

## A Handsome Building.

The sketch of the new central fire  
department building published today  
was made for THE INDEPENDENT by  
Architect Flynn from the plans which  
were only completed last week.

## THE PRINCESS PASSED THROUGH.

And did not Get up to Look at Mas-  
sillon.

The Spanish Infanta, the Princess  
Eulalie, her husband, Prince Antonio,  
and suite, under the escort of Com-  
mander Davis, U. S. N., passed through  
Massillon on their way to Chicago  
shortly before daylight this morning  
on a special section of the Pennsylv-  
ania limited, consisting of four cars.

The interior of the superb car occu-  
pied by the princess was beautifully  
decorated with flowers and vines and  
the Spanish colors.

It was given out in Pittsburg that the  
princess had retired at 7:45 o'clock, but  
those who chanced to be at the upper  
end of the platform as the train rolled  
in, saw the blond haired woman attired  
in a wonderfully fluffy robe de nuit  
standing in the door of her stateroom,  
calling for the porter with a very for-  
eign accent. She saw the curious ones,  
blushed, smiled and slammed her door.  
The prince was seen attended by two  
funkies, bewhiskered a la mutton chop,  
preparing to retire. The dark skinned  
members of the suite, attired in various  
degrees of undress uniform, were trying  
to make them selves comfortable in  
divers ways. The princess dined on  
her "a la Reine," Altona; Spanish onions  
were incl. dined in the bill of fare.

## A Pleasant Surprise.

The parents and friends of the teach-  
er and scholars met at Freeman's  
school house, district No. 3, Perry  
township, Friday, June 2, and marched  
into the school room in a body. The  
teacher was busy hearing a class recite  
when he heard some one outside. Sud-  
denly the door flew open, and in came  
about seventy-five people. It is useless  
to say that the teacher almost lost con-  
trol of himself, but after slightly re-  
covering, and with a hearty welcome,  
he dismissed his class, after which a  
large table was set out under the shade  
trees and soon filled with delicious es-  
capes. There were twenty large cakes,  
among them one which was a present  
to the teacher from his grandparents.  
In the time the dinner was announced,  
and about a hundred sat down to as-  
sume a dinner as ever was seen.

The afternoon was spent in social  
chats and a good game of ball, after  
which the teacher made a brief address  
followed by two class recitations and  
declarations by the following pupils:  
Nelson Baunach, Willie Schneider, Joe  
Rogers, Charley Fromm, Estella R.  
Lisman, Clara Fierstos, Dora Schaefer,  
Clara Berdel, Blanche Bonvalot and  
Clara Bonvalot, and a song by Verlie  
Borden and Anna Koons.

The performance being over, the  
teacher read the report of the school  
and after a few remarks he dismissed  
with the feeling that it was a day well  
spent. The teacher, J. B. Fierstos, is  
highly complimented upon the work  
for the two terms he has taught in the  
district, having again been employed  
for the coming winter. Mrs. Freeman  
and Mrs. Swihart, both over 80, were  
present.

## Latest Cinema News.

Eddie Myers, of Albert M. Watter's  
New Model Moral Shows advance  
brigade, was in Alliance Saturday,  
and slipped over to Massillon Sunday,  
to get "a smell of '68" and to explain  
that now he's used to it, he rather likes  
circus life, after all, and his opinion of  
it does not have to be expressed in  
dashes. Eddie had a hemorrhage at  
Stuebenville, brought on by smoking  
cigarettes, but he is quite recovered  
now, and he has given up smoking.  
The show is doing an immense busi-  
ness, he says, and coming money like  
the Philadelphia mint. Dr. Knott is  
still in advance and does the contract-  
ing, with Mr. Graham to assist, who  
looks after the routing. Mr. Watter  
has been buying more horses and has  
engaged an ossified man and a ventri-  
quist.

## The Clan McLain.

A number of the Massillon McLains  
expect to be present at the Clan Mc-  
Lain reunion, for which 20,000 invita-  
tions have been issued. It is to be held  
in Chicago about the middle of June.  
Sir Fitzroy Donald McLain, of London,  
the hereditary chief of the McLain  
clan, or members of the McLain fam-  
ily, accompanied by Lady McLain,  
called last week from London for the  
United States. The baronet is the  
hereditary chief of the clan, and has  
accepted the invitation of his clansmen  
of the United States, and who number  
scores of thousands, to be their guests  
during the World's Fair.

If in need of any kind of sausages,  
bologna, knockwurst or wieners,  
call for the celebrated West Side, man-  
ufactured by Graber Bros.

## JUNE'S FIRST WEDDING.

THE ARNOLD-UPHAM WEDDING TAKES  
PLACE THURSDAY NIGHT.

One Hundred Friends and Relatives As-  
semble to See Them Made Man and Wife  
—The Reception, the Guests, the Gowns  
and the Flowers.

(From Friday's Daily Edition)

The marriage of Mr. F. Willard Ar-  
nold to Miss Fannie Upham, only  
daughter of Mr. and Mrs. Edward B.  
Upham, took place last night at half  
past 8 o'clock. The Rev. Edward L.  
Kemp, rector of St. Timothy's church,  
read the service, and the spacious  
home, whose four walls have looked  
down on many similar scenes, was  
filled with friends. The Grand Army  
orchestra played its best, flowers and  
palms were everywhere, and with con-  
genial surroundings of every charac-  
ter, the happy occasion passed off most  
delightfully.

The ceremony took place in the  
north end of the double parlor. The  
familiar strains of the Wagner "Bridal  
Chorus" played "by the orchestra in  
the conservatory, announced the ap-  
proach of the bridal party, who entered  
from a rear door, passing through the  
two parlors and faced the minister in  
a semi circle. Two ushers, Mr. Charles  
W. Seiberling, of Akron, and Mr. Ed-  
ward Henderson, of Pittsburg, led the  
way, forming an aisle by unrolling two  
white ribbons as they moved. They  
were followed by the groom, Mr. Ar-  
nold, and his best man, Mr. Robert  
Skinner. The bride's maid of honor,  
Miss Henderson, of Pittsburg, came  
next, and last of all, and quite alone,  
the bride.

The informal reception over, the sup-  
per room was thrown open, the bridal  
party and the family being seated first.  
Dancing was then opened by Mr. and  
Mrs. Arnold, the most of the company  
quickly taking the hint, and thus the  
evening passed away. The full moon  
lighted up the walks outside, and in-  
vited the dancers to frequent promen-  
ades. Mr. and Mrs. Arnold withdrew  
while the gayety was at its height, and  
made their escape from under the pro-  
verbial shower of rice and old shoes,  
departing for Chicago, where they will  
spend their honeymoon.

One of the upper rooms those who  
chose, and none failed to do so, were  
enabled to see the beautiful presents,  
which came to the beautiful bride, from  
far and near. And while it will not  
do to particularize, it certainly may be  
added that the church, in whose choir  
her voice has been heard Sunday after  
Sunday, and for which she has unself-  
ishly done so very, very much, gave  
handsome recognition of these services  
by presenting a magnificent and com-  
plete set of table silver.

Next to the bride herself, her gown  
is the cynosure of all eyes, and though  
the bride's veil tried to hide dis-  
tracted much of this attention, she  
wore a becoming heavy white em-  
brodered satin, with round collar,  
full sleeves, and train, and veil of white  
crepe. But she was not permitted to  
gather in all the honors in this direc-  
tion. Miss Henderson, the maid of  
honor, wore a dainty striped china silk  
trimmed with lace. Mrs. Upham and  
Mrs. John Arnold both wore rich black  
silk. Miss Mary Arnold had a pretty  
cream Bengaline with lace. Among  
the other gowns that attracted at-  
tention—and the half are not mentioned—  
were the following:

Mrs. Edwin L. Arnold—A white bro-  
cade satin with full sleeves of light  
green velvet.

Miss Trowbridge—A particularly be-  
coming white point d'esprit, over green  
satin.

Miss Mary Ricks—White satin.

Mrs. S. R. Weirich—an empire gown  
of red.

Mrs. Warren Jacobs—Blue and pink  
striped taffeta.

Miss Mary Beatty—Lace over canary  
silk.

Mrs. W. K. L. Warwick—Black and  
white organdie and black lace.

Mrs. O. H. Kelley—Handsome black  
silk.

Mrs. S. A. Conrad—Electric blue em-  
brodered crepon.

Miss Harriet McLain—Blue figured  
taffeta.

Miss Bella Kelley—A white india  
silk with heliotrope velvet.

Miss Dearthoff—Pink india silk.

Miss Uman—An attractive gown of  
striped pink taffeta and lace.

Miss Garver—Mouselin de soie of a  
handsome shade of red.

Miss Ryder—Figured challie with  
pink and green satin, daintily de-  
signed.

Mrs. G. L. Albrecht—Light green fig-  
ured silk and lace.

Miss Albrecht—White mull with lace.

Mrs. Carrie Brown—A beautiful  
combination of white magenta silk and  
velvet with point Duchesse lace.

Miss Theodora Ricks—Green silk  
with velvet of the same shade.

The out of town guests and  
relatives were: Mrs. J. S. Ar-  
nold, Miss Arnold, Mrs. C. D.  
Kelly, Miss Kelly, Miss Mary Ricks,  
and Miss Theodora Ricks, of Cleveland;  
Miss Henderson and Mr. Edward Hen-  
derson, of Pittsburg; Miss Dearthoff,  
of Canal Dover; Miss Trowbridge, of De  
troit; Mrs. Alex. Garver and Miss Gar-  
ver, of Navarre; Mr. and Mrs. Edward  
J. Daville, of Canton; Dr. S. O'Donnell,  
of Philadelphia; George Upham,  
of Buffalo, N. Y.; J. E. Brown, of  
Mansfield; James K. Peacock, of Can-  
ton; Charles Sieberling, of Akron.

## NATIVE SAVAGE INSTINCT.

THAT STILL STANDS IN THE WAY OF  
EQUAL RIGHTS.

An Unusually Interesting Meeting of the  
Equal Rights Association—A Letter from  
the Rev. Anna Shaw—Mrs. Wallace  
Writes of New Zealand.

Illness, absence from town, sultry  
weather, and too much to do were  
some of the excuses for small attend-  
ance at the regular meeting of the  
Equal Rights Association Friday  
afternoon. After the usual routine  
business was transacted, a private let-  
ter from the Rev. Anna Shaw was  
read. It was full of enthusiasm in  
fueled by the woman's congress at Chi-  
cago.

"On the suffrage day," she wrote,  
"the jam was so great that we had to  
send for a force of twenty extra police-  
men to keep the crowds back. I told  
them it was not always so at suffrage  
meetings. Miss Anthony was the belle  
of the ball. Where she went the  
crowds followed. The joke of it all  
was that they tried so hard to keep  
suffrage in the background so as not  
to injure the meeting, and it was the  
one thing the crowd clamored for  
from first to last. The last night when  
the crowds came to the concerts and  
could have but one at a time because  
the noise was heard so plainly through  
the walls, they wanted some speakers  
to entertain the people in one hall  
while the concert was going on in the  
other. Out of the multitude of educa-  
tors, scientists and club women, Mrs.  
Henrotin actually called for the pres-  
ident and vice president of the National  
American Woman Suffrage Associa-  
tion to do the speaking.

"It was glorious for suffrage, and  
Aunt Susan thinks she and I can rest  
now that Mrs. Palmer, Mrs. Henrotin  
and all the world talk suffrage. Oh it  
is coming soon."

Mrs. Smith stated that a resolution  
endorsing woman suffrage was adopted  
without a dissenting vote, by the dele-  
gates assembled in the state conven-  
tion of the Christian church, held in  
Canton last week. Other churches  
would do well to follow. An interest-  
ing letter from Mrs. Catherine P. Wal-  
lace, now in Melbourne, Australia, was  
read. This letter was intended for the  
state suffrage convention at Delaware,  
but arrived too late for that occasion.  
Mrs. Wallace thinks that this year will  
give parliamentary suffrage to the  
women of New Zealand. In 1899 the  
measure was defeated by the votes of  
the two Maori members. There, as  
elsewhere, it is the native savage in-  
stinct that opposes equal political  
rights. The next parliament passed

the bill and it failed through the re-  
fusal of the director to sign. This  
year there are good reasons for be-  
lieving it will go through without diffi-  
culty.

The secretary was instructed to draw  
an order for rent due May 1st, past,  
and the meeting adjourned to convene  
the first Friday in September.

## THAT SUMMER THEATER

WITH PERFORMANCES THREE TIMES  
A WEEK.

Actor Steers Contracts for the Use of the  
Opera House, and Will Open His Season  
on Saturday, June 10—Vaudeville and  
Light Opera.

The Ogarta company closed their  
regular season last week. Mr. Steers  
and his wife remain here, and will op-  
erate a family theatre during the entire  
summer, presenting performances con-  
sisting of vaudeville specialties, drama  
and light opera. Bucher opera house  
has been rented and performances will  
be given tri-weekly, Tuesdays, Thurs-  
days and Saturdays. It will be the  
aim of the management to employ only  
the best specialty people. The summer  
season opens Saturday, June 10. The  
theatre will be thoroughly cleaned and  
renovated. Messrs. O'Hara and Kane,  
late of Al G. Field's minstrels, will be  
one of the attractions for the opening.  
Each performance will begin with an  
olio of specialties and close with a  
short drama. The prices of admission  
are ten and twenty cents and a change  
of bill each evening. Matinees every  
Saturday at 2 p. m.

## WHAT OTHERS SAY.

**BLOOD POISON**  
BODY COMPLETELY COVERED  
WITH A RASH AND RED  
BLOTCHES.

**EVERYTHING ELSE FAILED BUT  
LIVURA CURED.**

LIVURA MFG. CO.  
GENTLEMEN:—My  
little girl had Blood Po-  
ison; her system was all  
run down, her body was  
completely covered with  
a rash and horrid red  
blotches, owing to the  
intense itching she could  
not sleep. Her digestive  
organs were in a very  
bad condition; she com-  
plained of pain in the limbs and we were very  
much alarmed about her. We tried everything  
we could think of but nothing had the desired  
effect until we found PITCHER'S LIVURA. She  
had not been taking LIVURA more than one week  
when her eyes looked natural again, her appetite  
improved, and before the second bottle had been  
used, the rash and blotches disappeared, the itching  
left, and she is now PERFECTLY WELL and  
has gained flesh. All due to

## SULPHUR BITTERS

**ARE YOU**  
low spirited  
and suffering  
from the ex-  
cesses of  
youth? If so,  
Sulphur Bit-  
ters will cure  
you.

Is your Urine thick,  
ropy, cloudy, or high  
colored? Don't wait!  
Your KIDNEYS are  
being ruined. Use  
Sulphur Bitters.  
One bottle of Sul-  
phur Bitters will do  
you more good than  
all the Latin pre-  
scriptions of drugs and mineral  
waters which will remain in

NGS. me with this wonderful gift of writing for the papers. Why should I conceal it? Some of my best things are written," he says, "after I have gone home. They are done in the quiet hours of the night by the foreman of our paper."

The editor is a kindly man and speaks well of those who come to Anaconda if they subscribe for the paper, but often he changes his estimate of them if they do not and says they are no good. This keeps him busy and worn down mentally, for a great many do not subscribe. The children of his brain die young and have to be buried at once. The devil always airs the room or burns a rag after the editor has been using it for thinking purposes.

Many people go to Anaconda thinking that the great mine is there, but it is not. It is elsewhere. The smelter is at Anaconda and is so perfect that very few men are needed to run it.

Anaconda was a speculation. The owners of the big mine at Butte suddenly thought one day that they could make a town by putting up a smelter on a ranch which cost them \$1,500. Then each one of them located 160 acres besides. This laid out in lots brought over \$1,000,000, making a profit of 700 per cent, I am told. By removing this smelter to another ranch elsewhere I think another million might be realized. The way people follow a smelter around is very singular to me. I know a man quite well also who has made a comfortable fortune by owning a portable woolen factory, with which he has been enabled to establish over 18 towns, which are now occupied as happy homes by the antimer and the prairie dog.

Returning to the oyster and dressing room at Billings, we got some kerosene and pieces of board and built a fire in the range, warmed our feet in the oven and made hot coffee, which we drank between acts. Once I surprised Mr. Burbank with hot waffles and genuine maple sirup on his return from the pulpit. It was a pleasure to see him eat them. But the odor of cooking got out into the audience, and we had to quit. It was homelike while it lasted, for while the blast howled outside, to rub the waffle iron with a pork rind and hear it sizzle, and then to slap a big iron spoonful of the batter I had made myself into the red hot waffle iron, was joy—joy that reimbursed us for the naughty treatment of the cork headed man who ran the opera house at Bozeman and who had been excused from his job on the railroad, also from other places, promising never to do so again.

Bozeman is a thriving town of from 3,000 to 8,000, according to whom you ask. It is in the center of an agricultural district where as high as 1542 bushels of wheat grow per acre. Think of that, ye farmers who toil and coax the land to produce 12. This wheat is also much heavier than eastern wheat. So also is the bread made from it in some cases.

At Anaconda the day we were there a schoolboy 12 years old was reprimanded by the teacher, a man from Ohio. The boy did not reply till the teacher advanced toward him in a half threatening manner, when the boy advanced also, drew a large navy revolver and exclaimed calmly, aiming the weapon at the teacher's head:

"Man, you know not what you do. Think seriously of this or you will rue it. Advance one step further, and you are a dead man."

The teacher thought it over a moment, and then stepping out of the window without opening it he went down town and got an officer. Both desks and pupils are now examined every morning before prayers, and while opening the day's exercises with prayer the teacher only closes one eye.

"This education steers the tutor's mind. Just as the gun is bent the tutor's mind. We were greatly shocked to hear of this incident, for it occurred just at the time when we are generally visiting the public schools, and we might easily have been shot by accident, for we are not in favor of compulsory education and would not have taken sides in the matter.

As it happened, I was taking a buggy ride with Mr. Tighe toward the lower works of the smelting industry. I had never visited a smelter, especially after driving through a snowstorm. A brief description of the works may save hundreds of people from having to visit them, for I will make it so graphic that you will always remember it and can make anybody believe that you have been through all the degrees.

TAKING A BUGGY RIDE WITH MR. TIGHE.

We rode on pleasantly through the driving snow, and when I got to the door I had a lapful of the coldest, whitest snow one could well imagine. It drifted in behind my spectacles also and banked one ear full. As we came back I filled the other.

Smelting is the art of extracting all kinds of metals by means of crushing and broiling the ores. This ore contains copper and \$6 worth of silver per ton. As silver is so low, it is not taken out of the copper. Owing to the low price of silver we hitched the horse and went up first to the revolving furnaces, as I may say, into which the pulverized and washed ore is poured. The copper runs out in a fiery brook such as The Standard man will fish in when time hangs heavy on his hands in his eternal home, probably.

This copper is cooled in large gobs called mats.

The grinding or pulverizing and washing of the ore to make it ready for smelting would take too long to describe, but

it is marvelous how much machinery has taken the place of men, for there did not seem to be more than an ordinary thrashing crew operating the largest smelter in the world.

Bill Nye

P. S.—Owing to the low price of silver this letter is briefer than usual. I trust that something will be done by congress before I get home, or I cannot go on and complete my will. B. N.

A Slight Change.

The marriage license clerk was sitting at his desk thinking of how many people he had been instrumental in starting on their downward course when a red faced, raw boned young man from the country disturbed his reveries.

"How d'y' do?" said the visitor. "I come in to see you about a marriage license."

The clerk got out the big book and turned to where he had torn out the last one.

"Well," he said, "who is it for?"

"Who is what for?" asked the visitor.

"The license, of course. Don't you want a license?"

"Not if I kin help it. That's what I come in fer to see about. I got one t'other day, but I ain't used it yit, and I want to know about it."

"What do you want to know?"

The seeker for information took the paper from his pocket, unfolded it and spread it out on the desk.

"There it is," he said briefly.

"What's the matter with that?" inquired the clerk after he had looked it over.

"Nothin, legally, I guess, but you see the girl that is named in there has changed her mind, and she won't have me. I'm a hustler, though, I am, and I've got another girl that's willin fer keeps, but I don't want to spend no more money for licenses. Kin I get that name scratched out and t'other one put in, or have I got to blow in more wealth? That's what I come here to know about, mister."

The clerk rapidly glanced through the constitution of the United States, ran over a chapter or two of "Greenleaf on Evidence" and "Cooley on Torts" and gave the young man a new license without extra charge.—Detroit Free Press.

Only as an Example.

A certain good natured fatalism prevails in Russia as to the one crime of theft. At Saratov on the Volga a crowded steamer was about to start when the assistant captain, hurrying through a crowd of third class passengers, was suddenly stopped by a peasant who had previously complained that his money had been stolen.

"Your honor," he said, "the money has been found."

"Found! Where?"

"Sewed up in that soldier's mantle. I went over there to search for it, and sure enough there were 41 rubles and a 20-copek piece in my chamois purse."

"Where is that soldier?"

"There he is, asleep."

"Well, he must be handed over to the police."

"Handed over to the police? Why to the police? Don't touch him; let him sleep on. Sure, the money is found; what more do we want?"

And as the captain proved equally indifferent the matter was dropped.—Youth's Companion.

What Did He Want?

Among authors there are but few who take the slightest interest in social or political questions. So far as public questions are concerned, they are hardly better informed than Dante Gabriel Rossetti. During the French revolution one of his friends burst into Rossetti's studio with the incredible news, "Louis Philippe has landed in England!" "Has he?" said Rossetti calmly. "What has he come for?"—Argonaut.

Epistolary Perplexities.

"In short, X is a great personage. Suppose I address him. My honored master?"

"Nonsense! A scamp like that!"

"Say, what would you put?"

"I should simply write, 'My dear colleague.'"—Journal pour Tous.

Reason Enough.

He—Miss Moneybags has married her guardian.

She—What did she marry that old man for?

He—Oh, to keep her money in the family I suppose.—Life.

Posthumous Realization.

Chipinone—I understand Solomon Isaac died suddenly. What was the cause?

Ukerdek—Some one told him his life insurance would expire next day.—Vogue.

Subtle.

"That was a clever joke Bagley played on the mind reader."

"What was it?"

"Submitted himself as a subject."

Truth.

ORANGE BLOSSOMS.

OLIVE HARPER'S WISE THOUGHTS FOR FAIR JUNE BRIDES.

A ROSE That Leads to Happiness or Misery—The Sacrificial Robe—A Bride-maid's Gown—Pretty and Seasonable Material—Hats and Summer Novelties.

[Special Correspondence.]

NEW YORK, June 1.—If you want to know how much like an angel you can look, get a white crape, crepon or china silk gown and have it accorcion plaited.

NOVEL DRESS OF ACCORDION CRAPE.

Have the skirt made walking length in front and with a graceful demitrain in the back. Have the waist belted in with pale blue, pink or white ribbon and a deep frill of the same around the neck, and sleeves which reach to the wrist, falling from the shoulders in a way to suggest wings.

There is something so graceful in the modulation of the lines of material that is accorcion plaited that it is no wonder it has become the rage across the water and now bids fair to become as popular here for all such light fabrics. Black pongee and other lusterless silks are beautiful made in this style. The rainbow crapes and crepons are also well adapted to the peculiar treatment that wrinkles the fabric into the plaits that hang close or give with every movement of the wearer. It always makes me think of the long streak of moonlight laid across a summer sea in its shimmering undulation. And it is ample in width, though clinging so closely to the person in repose.

Odd, isn't it, that every year there is a crop of brides with the June roses? May is called an unlucky month, though why I cannot tell, and so June comes freighted with the odor of orange blossoms, and the peals of the wedding march join in the song of the birds, and the young girl dons her sacrificial robes, closes her eyes and walks through the church door which may lead to a happy and peaceful life where the grandest of crowns may be poised gently on her head—that of noble wifehood and motherhood—or it may lead to untold misery and such agony as only a woman can know when she sees her fairest dream shattered and gathers up the fragments, hiding them from all mortal eyes, and bears the burden alone.

But the robing of the fair young bride must be the same for those who walk up to happiness or who go down to the valley of tears and sighs. The looms have fashioned a new satin for them this year—a satin that has all the richness of that unapproachable material and with the frosty sheen of an invisible crape above it. How this is done none but the weaver can tell, but it looks as if some fairy spiders had spun minute threads all over the surface of the satin. The result is one of the most exquisite things I ever saw.

A June bride will wear a gown of it, the front of the skirt plain, with the diagonal white chiffon puffs across the bottom, held by a large bunch of orange blossoms and foliage. The train has a puff of the chiffon. The sleeves are "broken down" gigot, with frills at the wrist of lace, and there is a berth of the same around the neck and a neat arrangement of white satin ribbon crossing the bust to the shoulders and being brought down to the waist. Orange blossoms encircle the collar and form knots on the shoulders and at the belt.

FOR BRIDE AND BRIDESMAIDS.

The veil is of tulle and is gathered on top of the head in a sort of cloud and falls backward, held by a bunch of orange blossoms placed on the top of the head a little toward the front. The hair is dressed toward the top of the head in a sort of puff, leaving a few natural tendrils of hair to fall carelessly. A small, loose bunch of orange blossoms tied with a white ribbon not over a yard in all finishes this elegant and tasteful gown.

The bridesmaid is to wear a china silk with white ground, sown with blue forget-me-nots, and with four forget-me-not blue chiffon flounces, superposed and headed with ribbon of the same, tied in dainty knots every six inches. The sleeves are puffs of tulle of the same color, and the vest is of the chiffon, with lace bretelles. The hat is of blue straw, with blue and white flowers.

OLIVE HARPER.

Chicago's Population.

There is probably no city of importance in the world that can show such rapid and wonderful growth as Chicago since its destruction by fire. To-day its population is about 1,200,000. Mr. Peter Van Schaack, one of the leading merchants of that city said in conversation, that a large number of his personal friends, as well as scores of representative men throughout the Northwest with whom he had conversed upon the subject, had found St. Jacobs Oil a pain-curing and healing remedy of the most extraordinary efficacy. It is the Great Remedy for Rheumatism, Neuralgia, Sciatica, Backache, Bruises, Burns, Swellings etc.

(A copy of the "Official Portfolio of the World's Columbian Exposition," beautifully illustrated, in water color efforts, will be sent to any address upon receipt of 10c. in postage stamps by THE CHARLES A. VOGELER CO., Baltimore, Md.)

People who want the News while it is News look for it in "The Independent."

THURSDAY, JUNE 8, 1893

Findlay reported dying. Another gas well—the very biggest—discovered. Great people out at Findlay!

The Princess is in Chicago, and his dual nub, Verazua, has returned to the shades of oblivion. The duke did well to precede Eulalia.

It will not pay to become excited about oil discoveries in Stark county. Oil may exist in workable quantities and it may not. But keep cool about it.

Booth is dead, and no one has arisen to take his place. We have society actors of talent and intelligence, but for the "legitimate" there is nobody to fill Booth's shoes.

The Illinois Trust and Savings bank netted \$35,000 by the run made on the institution on Monday, that being the amount of interest forfeited by depositors. 'Tis an ill wind, you know.

Poor Willie Wilde! As the husband of Mrs. Leslie he might have slept till noon, and spent \$50,000 a year if he had only remained sober. Now he is to be divorced, and Mrs. Leslie says, "Willie must work."

Mr. Halstead is nothing if not erratic. This is his latest proposed "reform": "The highest and most solid ground the Republicans could take now would be to strike out, by the constitutional method, the 15th amendment. If the 15th amendment were out of the way, the natural forces would speedily be efficient in the enforcement of the 14th."

Lyman J. Gaze of Chicago's First National bank said on Monday: "The distrust developed today was entirely confined to small depositors in savings banks. Chicago banks are sound and solvent. The banks which have suspended were largely dealers in commercial paper, which the stringent financial situation rendered difficult to negotiate. I see nothing in the situation to excite alarm."

Sunday opening is not such a tremendous success after all. The crowds that clamored for admittance when the gates were closed, clamor no longer. Perhaps that is a bigger victory for those opposed to Sunday opening, than any the courts could give. The truth is, the question should have been settled before the fair opened, and any agitation after that was bound to create unpleasantness.

Dr. Ikert is a modest man. In the congressional directory he thus presents his autobiography: "Plain of manner and firm in his convictions, he has long been considered one of the staunch leaders and counselors of the Democracy of the eastern portion of the state. His influence has always been exerted in the interest of the masses and for conservative measures as against unsound, radical legislation."

Oil has been found midway between Massillon and Canton, and a company is being organized to sink trial wells in and around Massillon. If there is oil here, we want it developed. It will be recalled that a rich quality of oil was found on the Welker property, near the Massillon bridge works, when natural gas was sought. The oil feature never was much thought of and perhaps a mistake has been made by allowing the matter to drop so long.

A New York paper has been investigating the price of gas per 1,000 cubic feet in the principal cities of Europe and America. Here is the table:

New York	.....\$1.25	Washington	.....\$1.50
London	.....90c	Baltimore	.....1.25
Paris	.....1.00	Omaha	.....1.05
Berlin	.....1.15	Detroit	.....1.15
Vienne	.....1.10	Newark	.....1.40
Milan	.....1.40	Brooklyn	.....1.25
Cleveland	.....80c	Chicago	.....1.20
Pittsburgh	.....1.00	Jersey City	.....1.25
Montreal	.....1.25	Syracuse	.....1.30
Albany	.....1.00	Cincinnati	.....1.10
Kansas City	.....1.00	St. Louis	.....1.10
Louisville	.....1.00	San Francisco	.....1.10

The Boston Herald thinks that heresy trials are really an anachronism in our day. "They engage very earnestly the attention of a number of educated gentlemen, a large portion of whom are past middle life, but they are regarded with wonder when they are regarded with seriousness by the great bulk of the community. They do not belong to the present. They are a remnant and a reminder of the past that has been outgrown, and they hardly do more than parody the methods of a period to which they were appropriate. They are becoming more and more a curiosity and less a reality as the years

go by. They may outlast the present century, but we are inclined to doubt if they do. The next one will hardly smile in view of them any more than a good many sensible people do now."

## MR. CLEVELAND AND FINANCE.

The declarations of the President, made public today, on the subject of the financial condition of the country, are among the very best with which he is credited. One of Massillon's foremost bankers says that the pi by statement is equal to anything of Webster's. It would be advisable for everybody, especially the Democrats who clamor for free silver and for the continuation of the present policy as the thing next best to free silver, to ponder over this remark of Mr. Cleveland's:

"It is well for the people to take up the subject for themselves and arrive at their own conclusions as to the merits of a financial policy, which milages to purchase idle silver bullion with gold taken from our reserve. One does not need the eye of a financier to see that this gold, thus subtracted from the government's stock, is eagerly seized by other nations for the purpose of strengthening their credit at our expense."

"It does not need the art of statesmanship to detect the danger that awaits us upon the continuance of this operation. Already the timidity of capital is painfully apparent, and none of us can fail to see that fear and apprehension in monetary circles will ultimately bring suffering to every humble home in our land."

John Patterson visited his brother James and family at Warmington last Sunday.

Mr. and Mrs. Timothy Ramsey spent Sunday with their friends Mr. and Mrs. Fisher in Massillon.

Miss Ada Jackson, of Canal Fulton, is conducting a class in instrumental music in our village.

Mr. and Mrs. Geo. W. Selway drove up from Dell Roy and spent Sunday at the home of Mr. and Mrs. Jackett.

Geo. W. Richards is possessed with exceeding great joy for a son has come to his home to stay. Mother and babe are doing well.

A social party of about thirty took possession of Marion Piper's home on Wednesday evening of last week and gaiety reigned the entire evening.

Our school has vacated for the summer, but we notice that our village has attractions for teacher Smith of West Brookfield, that causes him to visit this place once or twice a week.

Miss Maggie Rummings one of our accomplished young ladies attended the teachers examination at Canton last Saturday. There were about ninety took examination and some of the questions were regu ar "stunners."

Peter Walters, of our oldest and most respected citizens, departed this life at his home on June 1, at the advanced age of 83 years. The funeral on Sunday was largely attended, the remains being interred in the Massillon cemetery, conducted by Rev. Elliot, of Canal Fulton. The deceased had lived on the farm on which he died for over thirty years. The farm was purchased at that time by the Hon. Geo. H. Hark, of Massillon, and the deceased was the only tenant he ever had on it. Mr. Hark, although in feeble health and the inclemency of the weather, attended the funeral. The deceased had been a great care to his family for the past three years, but was well taken care of by his daughters, Martha and Lucy, and his son-in-law, Mr. Koehler. Their conduct to their parents is commendable and is highly spoken of by all our people. The mother preceded the father to the silent land about eight months.

An ice cream and strawberry festival Saturday evening, June 10, on the M. D. church lawn, under the auspices of its members.

Mr. Hartman, the man who was so seriously hurt at the Penman mine, is improving slowly.

Mrs. A. L. Young and family are visiting Mrs. Young's parents at Smithville.

Mrs. S. Evans spent Tuesday in Massillon, the guest of her sister, Mrs. Collier.

Mrs. Dr. Kimber has returned home, after a week's visit at Smithville.

Jacob Bowers, jr., a carpenter of this place, fell from a building upon which he was working, spraining his ankle and receiving severe bruises about the head.

Miss Van Brooklin, of Sharon, Pa., who has been spending a few weeks with her sister, Mrs. Owens, has returned home.

The Greenville Challenge. The Greenville base ball club desire to challenge either the Dalton or Burton City clubs, for a purse of from twenty five to fifty dollars, at any place or time except Saturday's.

The challenge can be accepted through THE INDEPENDENT, or by addressing David Edwards, captain, at East Greenville.

The East Greenville club also desire to state that at Dalton, on Decoration Day, the score was 11 to 10 in favor of East Greenville, and not 9 to 10 in favor of Burton City, as announced.

The farmers are nearly through planting corn.

Mr. and Mrs. J. J. Wampler visited friends in Dalton Saturday afternoon and Sunday, the guests of Mr. and Mrs. J. M. McDowell.

We have a fine hotel here, Mr. and Mrs. R. A. Lucas, owners and proprietors, who set as fine a table as any hotel in the state.

A great many people were in town on Memorial Day.

W. S. Putnam has secured the contract for grading a portion of the road leading to Justus.

The Revs. Scarborough and Miller spent one day last week in Canal Dover and New Philadelphia.

The U. B. Sunday school observed Children's day Sunday, while the M. E.'s will hold appropriate exercises next Sunday evening.

Herbert Wyandt went to Wheeling last week, to remain a few days.

## IT WAS A LONG SESSION.

THE COUNCIL PASSES THE TAX ORDINANCE.

Fire Chief Burke Enters a Complaint—Mr. Yost and Sanitary Reform—Engineer Miller Asks to be Relieved—The Ordinance to be Regulated.

Seven members of the council, Mr. Cameron being the only absent one, endured the heat during a long session last night.

The street commissioner's report was read as follows:

Street commissioner.....\$ 99 97  
Streets and Alleys.....105 80  
Work on engine house lot.....12 75

A bill of \$30 was also presented by the commissioner for washing Main and Erie streets. This was not approved, however, and was not paid with the others.

PREPARING FOR KING CHOLERA.

Mr. George Yost from the lobby earnestly urged that the council, together with the county commissioners, take some action in regard to removing the debris which gathers at the railroad, trees which cross the stream, and toward cleaning the river of other matter that impedes the progress of the current, thus doing great damage to health and property by causing floods. The matter was, on motion, referred to Messrs. Matthews, Segner and Shoemaker as a special committee to confer with the county commissioners.

A communication signed by Fire Chief Burke was read, in which complaint was made of the action of the street commissioner in using, without authority, the hose from the hose house of Company No. 2 for cleaning the streets. Included in the communication was another complaint regarding the conduct of some of the members of Hose Company No. 2, who, it was charged, had disturbed the citizens living in the vicinity of the company's house. Mr. Volkmar moved that the communication be accepted and placed on the minutes. This was amended by Mr. Young, so as to refer to the committee on fire department to investigate and report.

THEY WANT A RAISE.

A petition was read from a number of residents of West Main street, asking that the street and sidewalks in front of their properties on said street between the P. & W. & C. tracks and West street be raised to a proper grade. On motion of Mr. Segner the petition was accepted and referred to a special committee, on which the president appointed Messrs. Segner, Lucius and Shoemaker.

A plan of the Ricks addition abutting West Main and West Tremont streets, which was approved a number of years ago, was presented for acceptance by the council. On motion of Mr. Yost, the solicitor was instructed to draw up an ordinance covering the matter.

Mr. Shoemaker reported that a property owner at the southwest corner of Walnut and Erie streets was encroaching on the streets to a distance of eighteen inches. The engineer was, on motion, instructed to investigate the matter.

THE APPOINTMENT MADE.

The following important ordinance was introduced, the rules were suspended and the measure given its second and third readings and then passed.

An ordinance to levy taxes for municipal purposes for 1893.

SECTION 1. Be it ordained by the city council of the city of Massillon, that there be levied for corporation purposes for the year of 1893 on each dollar of valuation on the grand duplicate, the sum of thirteen and two tenths (13 2/10) mills, and that said levy be apportioned as follows:

For general purposes.....1 Mill  
For lighting.....2 1/2 Mills  
For streets.....2 Mills  
For the department.....1 Mill  
For sewers.....5 10 of one Mill  
For water works.....2 3/4 Mills  
For sinking fund.....2 Mills

SECTION 2. That the city clerk is directed to certify the above levy to the county auditor to be placed on the tax list for collection. SECTION 3. This ordinance shall take effect from and after its passage.

Mr. Shoemaker reported that City Engineer Miller had decided, owing to his continued ill health, not to resume his official duties this summer and that he desired that the council relieve him of all property in his office belonging to the city. He also had some valuable maps and charts which he was willing to sell to the city. Mr. Young's motion to appoint a special committee of three to meet Mr. Miller in his office was carried and the president appointed Messrs. Young, Matthews and Volkmar as the committee.

That the clerk be instructed to notify Russell & Co. that the council will accept either of the firm's propositions for the sale of a road roller as soon as a machine satisfactory to the council is constructed. Passed.

That the city solicitor present to the council an ordinance regulating busses, coaches, baggage wagons and hotel runners. Mr. Young moved to amend by adding the word, "baggage street cars," but the amendment was lost for the want of a second, and only the original resolution was passed.

A Massillon Man Hurt.

Barney Pyle, a young man aged 24 who is employed in Massillon, went to Canton Saturday night to get his clothes, which were at a saloon in Dorn alley, where he boarded previous to his coming to Massillon. While in the saloon he had some trouble with a number of men in the room and rushed out onto the P. & W. track, which was close by. A few moments later he was picked up almost unconscious, suffering from an ugly gash over one eye. Pyle claimed that he was struck with a mace by someone in the saloon. The people in the building deny this and say that he was struck by a yard engine as he was crossing the track. Two members of the shifter crew assert, however, that the young man was not struck by the engine.

Want a W. & L. E. Outlet.

The Minglewood Coal Company expect to connect their mine near North Lawrence with the Wheeling & Lake Erie railway. Bids for two miles of track were opened last week, at Wooster, by the president of the company, James Mullens.

Now your blood should be purified. Take Hood's Sarsaparilla, the best spring medicine and blood purifier.

## THE DIVORCE MILL BUSY.

Court House and County News—Real Estate Movements.

CANTON, June 6.—Anna B. Poole, through her attorney, R. H. Folger, has commenced proceeding in court for a divorce from William Poole, charging the latter with misconduct and neglect. She also charges the defendant with repeated brutal assaults, during which she received painful kicks on the head and side. The plain tiff requests the custody of their 18 months old child, George W. Poole.

Lyda E. Barnhart charges her husband, Pius F. Barnhart, with wilfully deserting her, and has petitioned the court for a divorce and the custody of their child, Sarah A. Ca.

Ira Gamble has petitioned for a divorce from Edward Gamble, charging the defendant with extreme cruelty and with making repeated threats to kill her. The plaintiff claims that although her husband made good wages he spent his money in drinking and gambling and failed to provide for her and their child, of which she requests the care.

The Dueber-Hampden works were shut down today, and will not commence work until July 10.

John T. Bender has been appointed executor of the estate of Paulina Benoe of Canton.

Frank Miner has been appointed administrator of Conrad Miner, of Crystal Springs.

Marriage licenses have been granted to Emory Hopper and Edna Cal, Alliance; H. O. Sonnenbatter and Catherine Hansen, and Joseph Janosh and Frances Scherer, Massillon; Sherman W. Case and Ellen J. Sager, Alliance.

REAL ESTATE TRANSFERS.

Massillon, first ward, Eliza Bechtel's heirs to John H. Bechtel lots No. 1060 69, \$100.

Massillon, third ward, Thomas Bashe to Lorenz Grinn, lot No. 1523, \$800.

Lawrence township, Mary E. Dague to John M. Anderson, 97 46 100 acres, \$1,500.

S. J. Anderson to John Anderson, 50 acres, \$1 00.

DRILLING FOR OIL.

A Well Near Reesdurban—Canton and Court House News.

CANTON, June 5.—The land surrounding Reesdurban is being secured by a Pittsburgh oil and gas syndicate. The Bordner, Dannemiller and Miller farms have already been leased, and a test well will be put down soon. The land has been inspected by an expert, who is positive that oil can be found in large quantities.

Charles Oberly, deputy clerk of court, is spending the week in Chicago.

The Mansfields defeated the Cantons at Hampden park, yesterday, by a score of 9 to 4. A second game will be played today.

A marriage license has been granted to Charles A. Bitts and Lizzie M. Haney, of Alliance.

REAL ESTATE TRANSFERS.

Massillon, first ward, James Jacoby to John McBride, lot No. 352, \$4,000.

Perry township, A. Clements to Samuel B. Stern, lots 11 and 12 in the Clementz addition, \$600.

Lawrence township, J. Dounewirth to Matilda Dounewirth, 11 35 100 acres, \$597 45.

M. Dounewirth to Charles Oberlin, 3 52 100 acres, \$184 80.

LESS THAN A MILLION

Is the Total Return of Personal Property for Taxation.

The board of equalization now has reports from all the assessors. The total returns of personal property are as follows:

Ward one	.....1892	1892
Ward two	.....\$30,422	\$30,548
Ward three	.....121,015	136,152
Ward four	.....321,345	329,027
Total	.....94,992	94,946

The new structures are not half reported, but the following are the figures given:

Ward one	.....1892	1892
Ward two	.....34	31
Ward three	.....22	22
Ward four	.....36	21
Ward five	.....20	16
Total	.....124	90

The decrease in several wards is attributed by the members to the inability or lack of zeal on the part of the assessors to get at the facts. The item of credits is very rarely given right. The board expects to raise the total returned by the assessors very materially.

WILLIAM C. GRANT.

Death of one of Navarre's Best Known Citizens.

NAVARRE, June 5.—William C. Grant, one of the best known and most prosperous farmers in this vicinity, died this morning after several months' illness, aged 75 years. His widow and four sons, James J. of Canton, Lawrence of Coshocton, Horace of Tacoma, Wash., and Venzio, a student at Yale college, survive.

The funeral of Mrs. Augustus Crossland was conducted by Presiding Elder Siffert, at the U. B. Church, Sunday afternoon. Mrs. Crossland was an exemplary Christian woman, and her loss will be deeply felt.

J. J. Phillips & Co. are vacating the Miller store room today. Will H. Stahl will occupy the room this week.

John F. Grossklaus purchased a fine surry last Saturday.

The Sunday school entertainment at the brick church, last evening, passed off pleasantly.

Seriously Hurt at Dalton.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

## ABSOLUTELY PURE

## A GALA WEEK AT CANAL FULTON.

Commencement Exercises and Attendant Festivities.

CANAL FULTON, June 5.—This is Canal Fulton's gala week. Special exercises will be held in school during the week in all the departments. Wednesday night the juniors give their annual entertainment in the high school room, and Thursday night commencement night, a class of ten graduating. Yesterday the Rev. H. H. Emmett delivered the baccalaureate sermon in the Presbyterian church and delighted his large audience. It was conceded by all that we never had a more eloquent sermon. Dr. Jeffries preached in the evening. Saturday evening Prof. Foelt gave a delightful reception from 7 to 10 o'clock for Messrs. Emmett and Jeffries. The myriads of colored lights from the Chinese lanterns made the lovely grounds charming, and for three hours Prof. Foelt and Mrs. Foelt received their many friends and presented them to their guests. Refreshments were served in the dining room and all that a charming host and hostess could do to entertain was done, and a delightful evening was spent by all who were present.

## THE FOSTER FAILURE.

William Johnson Talks With the Ex-Secretary.

William Johnson returned Tuesday noon from Postoria, where he went immediately after the Foster failure. He has had several long conversations with the ex-secretary, and says that the estate will by no means pay fifty cents on the dollar, and that Mr. Foster will not agree to such a settlement since he knows that he cannot meet fifty per cent of the claims. In spite of the public misfortune, Mr. Johnson says that not an unkind word is said concerning Mr. Foster, and the local creditors are disposed to laugh at their own distress.

The late chief of the treasury department has become nervous and worn and has aged perceptibly. The liabilities increase as the examination proceeds and are likely to approximate one million dollars.

## CEMETERY VANDALS.

They Ruthlessly Pluck Flowers and Destroy Fine Plants.

Great complaint is made by cemetery lot owners concerning the destruction of flowers and shrubbery by visitors. As an instance in point, Mrs. Hicks Brown purchased a very valuable lavender hydrangea, from which fourteen cuttings have been removed by persons who appreciate the beauty of the plant, but whose unlawful means of getting slips. Ten of these cuttings were made Saturday and four Sunday. Sexton Merrill is able to name six of the guilty women and took prompt measures, informing Mrs. Brown and the proper committee. Several have called upon Mrs. Brown to apologize and their offenses will be overlooked this time. The very next culprit will be arrested, however, and in addition to the usual exposure will have a \$1.00 fine.

## CEMETERY VANDALS—CONTINUED.

Some Strong Words on the Subject from a Lot Owner.

MR. EDITOR—As you have spoken of cemetery vandals in yesterday's paper, let us hope that you will do the community a great and lasting good by helping through its columns to cry out and hunt down those persons who now visit the cemetery but to destroy and pillage.

Not only do these people steal plants and destroy flowers, but after resting upon the iron bench provided by a lot owner show their appreciation by knocking off an arm of the bench and scattering peanut shells and banana skins upon the grave near.

These roughs usually go in numbers, and should the sexton say anything to them concerning the proceedings he has found by experience that they are ready to threaten him for interfering with their unseemly carousal.

Handsome and costly flowers, placed by loving hands upon the graves of their dead were stolen on Decoration day, and in their stead cigar stumps and peanut shells were strewn about. This sort of thing is an outrage, and should appeal to every true citizen to make it his or her duty to urge the authorities to provide some means of protection, and now that the cars carry so many people to the cemetery the evil is growing. It is the place of our dead—a sacred place, let the living protect it.

## The Strawberry Show.

The strawberry show of the Stark County Horticultural Society will be held at the fair grounds at Canton on Wednesday, June 21. Everybody is invited, whether members of the society or not. Premiums will be awarded at this meeting for the finest display, of best berry, and finest quart of strawberries. There will be barriers for sale on the grounds. Bring your baskets and stay all day. S. H. ROCKHILL, Secretary.

## Justice Paul Appointed.

Gustavus G. Paul has been appointed by the county auditor to serve as deputy auditor of the Massillon city board of equalization in place of George Schoer, who has resigned on account of illness.

## The World's Fair.

Can not remain such without the blooming look and radiant complexion which health alone imparts. Park's Tea, by clearing the blood of impurities, makes the complexion regain the hue of youth.

## COURT HOUSE AND COUNTY.

Suit Instituted—Licenses Issued—That Oil Well.

CANTON, June 7.—The Hanover Shoe Company have commenced proceedings in court against John D. Frank, praying for judgement in the sum of \$549 80, alleged to be due for goods sold and delivered to the defendant, by the Hanover Company.

Cicero L. Hiner has been appointed administrator of the estate of Zetta J. Foster, of Canton.

The will of William C. Grant, of Bethlem township, has been filed. Marriage licenses have been granted Ross A. Streeby, and Ada A. Diller, of North Lawrence, and William W. Worthington and Mildred K. Brown, of Massillon.

One hundred and ninety lots have been sold in Reesdurban.

The Pittsburgh oil and gas syndicate, which has leased the Bordner, Miller and Dannemiller farms, will sink a test well soon.

## Specimen Cases.

S. H. Clifford, New Cassel, Wis., was troubled with Neuralgia and Rheumatism, his Stomach was disordered, his Liver was affected to an alarming degree, appetite fell away, and he was terribly reduced in flesh and strength. Three bottles of Electric Bitters cured him.

Edward Shepherd, Harrisburg, Ill., had a running sore on his leg of eight years' standing. Used three bottles of Electric Bitters and seven boxes of Bucklen's Arnica Salve, and his leg is sound and well. John Speaker, Catawba, O., had five large Fever sores on leg doctors said he was incurable. One bottle Electric Bitters and one box Bucklen's Arnica Salve cured him entirely. Sold at Z. T. Baltzly's Drug store.

Dr. M. J. Davis is a prominent physician of Lewis, Cass county, Iowa, and has been actively engaged in the practice of medicine at that place for the past thirty-five years. On the 20th of May, while in Des Moines enroute to Chicago, he was suddenly taken with an attack of diarrhoea. Having sold Chamberlin's Colic, Cholera and Diarrhoea remedy for the past seventeen years, and knowing its reliability, he procured a 25 cent bottle, two doses completely cured him. The excitement and change of water and diet incident to traveling often produce a diarrhoea. Every one should procure a bottle of this remedy before leaving home. For sale by Morgenthaler &

when he reached the box at the corner of North and High streets. He was of course, unable to remove his key, and was obliged to apply to Chief Burke to get it released. Then Mr. Martin treated the entire force in order that nothing might be said about it, and of course nothing was.

**A WEDDING AT ST. MARY'S.**

The Marriage of Henry Sonnhalter to Miss Catherine Hansen.

A marriage of interest to many Massillon young people took place in St. Mary's German Catholic church at half past 8 o'clock Tuesday morning. The bride, Miss Catherine Hansen, is a daughter of Mr. and Mrs. Dominick Hansen, and the groom, Henry Sonnhalter, is a son of Mrs. John Sonnhalter. The auditorium of the church was filled with witnesses, and in the aisles and around the chancel potted plants and cut flowers were tastefully arranged.

The bridal party entered while the Mendelssohn march was being played by Organist Gustavus G. Paul, the ushers, Messrs. Henry Weinrich and Edward Hansen, the latter a cousin of the bride, coming first. Then followed the groom and his best man, Mr. John Erle, and finally the bride and her sister, Miss Anna Hansen.

The bride's gown was of cream colored satin trimmed with silk point lace and made with a train. She wore a veil and white roses, and carried in her hand a satin bound prayer book of white. Her maid wore a pink china silk with point lace and she also wore white roses.

The ceremony which was performed by the Rev. James Kuhn was attended by a solemn nuptial mass conducted by the Rev. Kuhn as celebrant and Father Goeblies of St. Barbara's church, West Brookfield as deacon. The musical portion of the services consisted of Farmer's mass by the choir of St. Mary's.

After the ceremony at the church, the bridal party was driven to the home of the bride's parents in Chestnut street where the wedding breakfast was served. A reception will be held at the same place at 3:30 o'clock this afternoon. One hundred and seventy-five invitations have been issued. The house has been prettily decked for the occasion with flowers and potted plants.

Mr. and Mrs. Sonnhalter will leave tonight for a two week's visit in Pittsburgh and Washington, and upon their return will reside in their new home in East Cherry street.

The young couple enjoy the acquaintance and friendship of a large circle of Massillon and out of town people. Mr. Sonnhalter is a member of the well-known firm of Sonnhalter Bros., grocers. His bride has, for the past four years been a teacher in the parochial school of St. Mary's church, and among the many handsome gifts consisting of furniture, china, silver, and other articles, was a handsomely upholstered chair presented by her fellow teachers.

**THE PENNSYLVANIA COMPANY.**

Earnings Amounting to \$1,229,973.—Leased Lines Results.

The annual meeting of the stockholders of the Pennsylvania Company was held in Pittsburgh yesterday. The report shows: Total income, \$2,817,304.03; expenses, interest, etc., \$1,587,330.19, leaving a profit after all expenditures of \$1,229,973.84. A 4 per cent. dividend on the \$21,000,000 of stock was declared and after the payment of this, the surplus for the year was \$389,573.84.

The results on the principal lines operated were as follows: Pittsburgh, Ft. Wayne & Chicago railroad, a profit of \$290,388.10; a decrease as compared with 1891 of \$655,749.93; Pittsburgh, Youngstown & Ashtabula railroad, an increase in net earnings as compared with 1891, of \$57,919.88, or over 12 per cent.; Erie & Pittsburgh railroad, a loss for the year equal to \$206,429.60; Cleveland & Pittsburgh railroad, a profit of \$440.41, against a loss for 1891 of \$14,794.81; Toledo, Walhonding, Valley & Ohio railroad, an increase in net earnings as compared with 1891 of \$36,355.67; Indianapolis & Vincennes railroad, a loss of \$94,668.08, being an improvement over 1891 of \$43,982.25.

**BY A CANTON MINISTER.**

Two Massillon Young People to be Married Today.

William Worthington and Miss Mildred Brown drove to Canton this afternoon, and will be married at that place at 3 o'clock by the Rev. O. G. Brelon, of the Christian church. This evening a supper will be given in honor of the young couple by Mrs. Edward Snyder, who is a sister of the bride, at her home in East South street. Mr. and Mrs. Worthington will reside for the present with Mr. and Mrs. M. D. Whitney, in East Oak street.

The bride is a daughter of Mrs. Orville Brown, and is a general favorite among the young people of the city. Mr. Worthington, who came here two years ago from Akron, is a machinist at Russell & Co.'s works, a musician of much ability, and a member of the Massillon Military band. He has made many friends since his arrival. He is a nephew of Marshal Hagan, with whom he has resided ever since he came.

**That Brick Yard Dispute.**

Another phase in the dispute over the possession of land which is now on between the W. & L. E. Railway Company and Messrs. Borden & Pepper was developed yesterday when the latter swore out a warrant charging John Schlosser, a W. & L. E. Company's carpenter, with destruction of property, the offense consisting in the removal of a portion of a barn owned by the plaintiffs. Schlosser was taken before Justice Folger yesterday afternoon by Constable Cannon and was bound over to court.

**One New Factory at Work.**

A small force of men commenced work in the J. H. & D. Lake Co.'s works this morning. The remainder will start just as soon as the machinery has been erected. The large engine which supplies the power for the running of the plant has not yet arrived, and a small Russell engine is being used temporarily.

# OUR STREET PAVEMENTS.

## INTEREST IN THEIR MAINTENANCE AROUSED.

Superintendent Inman, of the Water Company, Tells How He Goes About Making Street Connections—No Written Permits Required.

Citizens are beginning to take a more active interest in matters affecting street pavements, and it is a most hopeful sign. Prospect street properly owners, without intending to reflect upon the good intentions of the contractors, have appointed a committee to see that the contract for paving that thoroughfare is strictly carried out, and another subject more difficult to handle, is that of the cutting up of the improved streets to make connections, and the repair of bad spots caused by defective workmanship. The Massillon Water Company is now making several such connections in South Erie street, for the purpose of attaching new hydrants, located by the council.

"It is unfortunate that this has to be done," said Superintendent Inman, "but being necessary we try to do the best for the city. It may be that some contractors open the streets without permits, but we never do. We get an order from the proper council committee, in every instance."

"Is it in writing?"

"No; that is not required at present. Undoubtedly it should be. Builders are now compelled to take out a permit from the city clerk, and it is certainly more important that those who have to dig up the streets should be replacing the earth we employ two shovelers and one tamper, and then give the filling a few days in which to settle, before repaving."

"Why," continued Mr. Inman, "pointing to one freshly filled trench, 'we hauled a cart load of gravel ourselves and put into that ditch, in addition to what we took out. There isn't more than two inches of gravel under the bricks about here, as you can see, and the tar does not fill the joints, and some are entirely empty. I noticed that the tar was more carefully applied on Railroad street. No, I think that the Water Company is not doing careless street work, and if any is done by its employees it is contrary to instructions.'"

The pavement most in need of repair is on East Main street. This was laid just one year ago. There is a bad depression following the course of the sewer, and the work is none of it first class. In front of Mrs. R. A. Bahney's a deep hole exists. This the street commissioner has filled with gravel. It would have taken a few hours more time to have removed the bricks and repaired it properly. The "temporary" repair has stood now for about three weeks.

**PERRY YOUNG'S OPINION.**

Councilman Perry H. Young is one of the friends of street improvements. Mr. Young said this morning that as a member of a council committee, he had obtained figures for the repairing of the Main street pavement, from Mill to Pine streets, and it would cost \$350 to put it in apple pie order. He thought that the work would be ordered soon. He was greatly in favor of compelling all persons desiring to tear open the streets for necessary purposes to take out a permit in writing, and in addition to paying a fee of say five dollars, to give bond for the return of the street to its original condition. He cited the fact in illustration of the need of such an ordinance, that bricks had been removed without authority, near his house, last winter, and at this late date had not been replaced. Mr. Young is in favor of sharp measures for the protection and preservation of the streets.

**MR. CAMERON ON THE COMMISSIONER.**

Councilman Cameron is firmly of the opinion that something should be done to protect the paved streets, but what that should be, he did not feel like saying on short notice. He thought that more should be expected and accomplished by the street commissioner. This official, so Mr. Cameron thinks, and says is a law unto himself, and does just as he pleases.

**HE WANTS A SWEEPER.**

Wayne Matthews, councilman for the second ward, believes in the purchase of a street sweeper. He says that scouring the streets with fire hose, as done by the street commissioner, washes out the interstices and disintegrates the pavement. He thinks that Commissioner Vogt does a good deal of work that is not fully appreciated—that is, it covers such an extent of territory as not to be seen and understood. As to an ordinance requiring persons who desire to tear up the pavements, to take out a permit in writing, and pay a fee for the same, he is in favor of it.

Mr. Matthews thinks it is just as well to allow Main street to stand for a while, and let the depression settle.

**ABOUT THOSE HYDRANTS**

Ed Segner, member from the first, wants the streets protected in every possible way. He regards the tearing up of South Erie street as unnecessary and irregular, and says that the hydrants could have been located on unpaved streets near enough to the places it is designed to protect.

**The First Concert.**

THE INDEPENDENT announces with much pleasure the first appearance in open air concert of the new Massillon Military band, in the band stand in the park, on Friday evening. The following is the programme:

1. Tannhauser March.....Wagner
2. Overture—Semiramide.....Rossini
3. Dream on the Ocean Waltz.....Gund
4. Recollections of the War.....Beyer
5. Un Recuerdo a Salamaen Schottische.....Oscar Pagner, Director.

**Now Try This**

It will cost you nothing and will surely do you good, if you have a cough, cold, or any trouble with Throat, Chest or Lungs. Dr. King's New Discovery for Consumption, Coughs and Colds is guaranteed to give relief or money will be paid back. Sufferers from La Grippe, found it just the thing and under its use had a speedy and perfect recovery. Try a sample bottle at our expense and learn for yourself just how good a thing it is. Trial bottles free at Z. T. Baltzly's Drug Store. Large size 50c and \$1.00.

# THEIR ANNUAL ELECTION.

## Stockholders of the People's Building and Loan Company Meet.

The annual meeting of the stockholders of the People's Building and Loan Company was held in the office of the secretary, John E. Johns, last night.

Messrs. C. B. Allman, John A. Shoemaker and Daniel Hemperly were elected directors, to serve for three years. The resignation of Anthony Howells as a director was presented and accepted, and Thomas J. Brown was chosen to fill the vacancy thus caused.

The newly elected directors, after qualifying, organized their board by the election of Daniel Hemperly as president, C. B. Allman, vice president; Jacob D. Wetter, treasurer; R. W. McCaughey, attorney, and J. E. Johns, secretary. These officers were all re-elected except Mr. Hemperly, Mr. Howells having served as president during the past year.

The old appraisement committee, Messrs. Matthias Erle, Andrew W. Smith and John A. Shoemaker, were also re-elected, and Messrs. E. A. Jones, Frank A. Snyder and Thos. O. Brown were chosen as the finance committee.

Secretary Johns' annual report is now in course of preparation and will be published within the next two weeks.

# THEIR LAST MEETING.

Mr. and Mrs. Drake Entertain the Young Married People.

Mr. and Mrs. Frank P. Drake acted as host and hostess to the members of the Young Married People's Euchre Club last night. Thirty-two games were played during the evening, and the prizes were won by Mr. and Mrs. James M. Bayliss, the former receiving a cut glass paper weight, and the latter a decorated china pitcher. After the games luncheon was served.

Last night's meeting was the last which will be held by the club until next fall. The members have thoroughly enjoyed every evening spent in the pleasant pastime of progressive euchre, and it is their intention to make the organization a permanent one.

**A Medical Success.**

The France Medical Institute, 38 and 40 West Gay street, Columbus, Ohio, is open for the visits of patients from nine in the morning until nine in the evening. Those patients who live sufficiently near will generally find a personal interview to their advantage, either at the Institute or with one of the physicians who makes regular visits to your town. The physicians in charge fully appreciate the feelings of their patients and endeavor to give entire satisfaction to the large number constantly under treatment. That they are successful in this respect is conclusively proved by the letters on file at the Institute from old patients and giving names of friends to whom they wish treatment sent. They do not claim to work miracles, but do claim in all honesty and candor to cure cases that are at all curable. Let those given up by others call for free consultation.—Post.

**DRS. FRANCE AND OTTMAN,**

Formerly of New York, now of The France Medical and Surgical Institute, Columbus, Ohio, by request of many friends and patients, have decided to visit Canton, Thursday, June 15. Consultation and examination free and strictly confidential in the private parlor of the Barnett Hotel from 9 a. m. to 6 p. m., one day only.

**Little Things That Tell**

It is the little things that tell—little brothers for instance, who hide away in the parlor while sister entertains her beau, etc. Dr. Pierce's Pleasant Pellets are little things that tell. They tell on the liver and tone up the system. So small and yet so effectual, they are rapidly supplanting the old-style pill. An infallible remedy for Sick and Bilious Headaches, Biliousness and Constipation. Put up in vials, convenient to carry. Their use attended with no discomfort.

**Mr. Chas. N. Hauer**

Of Frederick, Md., suffered terribly for over ten years with abscesses and running sores on his left leg. He wasted away, grew weak and thin, and was obliged to use a cane and crutch. Every thing which could be thought of was done without good result, until he began taking

**Hood's Sarsaparilla**

which effected a perfect cure. Mr. Hauer is now in the best of health. Full particulars of his case will be sent all who address

C. L. Hood & Co., Lowell, Mass.

**HOOD'S PILLS** are the best after-dinner Pills, assist digestion, cure headache and biliousness.

**Hood's Remedies** are for sale by F. S. Craig.

We welcome honest competition, but when a competitor boldly claims that official tests show all other baking powders inferior to his in purity and strength, it is simple justice to state that Official Reports show that this so-called "absolutely pure" baking powder really contains ammonia. That the public may know who tells the truth we give the actual figures from the

CARBONIC ACID GAS, (leavening power.)		
CLEVELAND'S SUPERIOR, (pure cream of tartar powder.)	NEXT HIGHEST, (ammoniated powder.)

# Cleveland's the Strongest

of all cream of tartar powders, and, what is more important, it is absolutely free from ammonia, alum and other adulterants.

# MR. KILLINGER'S HOUSE.

IT WILL BE BUILT OF ROUGH HEWN LOGS IN OLD TIME STYLE.

Modern Taste and Ingenuity Applied to Pioneer Days Materials—From the Tower One Can See Nearly to Navarre—An Ornament to Massillon's Suburbs.

General Agent Killinger, of the Canton-Massillon railway, has conceived a novel idea, which he expects to utilize soon. He owns a tract of land on the south side of the high road just east of the Clement Russell farm. This tract offers a splendid site for the erection of a house, as it is of lofty elevation, and from it a grand view to the southwest nearly as far as Navarre can be obtained.

Mr. Killinger proposes to erect on this land a residence for himself which will be constructed of rough hewn logs, cemented together after the fashion employed by early settlers. Instead, however, of using mud as a cement, some sort of plaster will be substituted.

No definite plans for the structure have yet been completed, but Mr. Killinger has been exhausting considerable gray matter, and has evolved several original ideas which he expects to put into use in the building of his new home. The house will be two stories in height, and on one side a high tower will rise from the ground to a point several feet higher than the roof. A broad piazza will extend across the entire front and a part of the tower side.

The first floor of the interior will, with the exception of a room in the rear, consist of one immense apartment, with a big old-fashioned fire place and a winding stairway, running up from the entrance hall, which is to be at the foot of the tower.

On the second floor will be several spacious sleeping apartments. The interior will be in keeping with the exterior, and the entire house will be constructed with a view to comfort, convenience and roominess. Mr. Killinger is unable to say at present when the structure will be commenced, but he is already having logs hauled so as to be ready to build as soon as the plans are drawn.

The idea is one that is worthy of serious thought on the part of persons who are fond of suburban life, and who contemplate building, and Mr. Killinger's new home will only be one of many that will undoubtedly spring up on the Canton road during the coming season.

"Is this hot enough for you," is a silly question, but if you meet a man who complains of suffering from the heat, ten to one you will find upon inquiry that he does not use Ayer's Sarsaparilla to tone up his system and free his blood from irritating humors.

I have been a great sufferer from dry catarrh for many years, and I tried many remedies, but none did me so much benefit as Ely's Cream Balm. It completely cured me. M. J. Lally, 39 Woodward Ave., Boston Highlands, Mass.

# JERSEY CATTLE.

**Their Breeding and Care.**

An Abstract of an Address Delivered Before the Students of the School of Agriculture of the Ohio State University by J. A. Peasey, Flint, Ohio, Secretary of the Ohio Jersey Cattle Breeders' Association.

## PART II.

Manner of Breeding.—It is always best to select some type or quality and breed for it. The quality usually sought in breeding Jerseys is to perpetuate some animal of phenomenal performance. Our inquiry here will then be, how can a desired type or quality be perpetuated? I am fully aware that I am entering upon disputed ground. The best method to preserve the desired quality in a dairy animal is in my judgment in and in breeding and line breeding, and I think the collated experience of breeders in general will bear me out. Successful in and in breeding depends largely upon the soundness and uniform qualities of animals so coupled. If these animals have defects they will be intensified in the progeny. But where we have an animal possessing to an eminent degree the quality we desire in our herd, we can produce this quality by close inbreeding so long as the descendants are robust and strong, but no further. Where in and in breeding has been practiced there are always animals related having the same qualities which can be coupled with those in and in bred so far that defects were feared. This is line breeding, and to many it is preferred to close breeding. It is by inbreeding that all types and families have been established. And it is by inbreeding and line breeding that these types are maintained. In animals inclined to obesity I think the practice of very close breeding would prove disastrous. In the case of the Jersey we are not troubled with obesity by inbreeding and line breeding. It can readily be seen that to secure a type we establish it by inbreeding and perpetuate it by line breeding, and again returning to close inbreeding. A careful student in this department on examination will find a large percentage of our great performers to be inbred or sired by inbred bulls. (The speaker then called attention to several prominent families which were founded by this method of breeding.)

These are among the considerations to be taken into account when selecting a bull. "If you can not find one that suits you, have one bred to order." Disposition.—The disposition of the bull in most cases has been made and not inherited. His temper should be even and he should show kindness. To handle the bull properly it should be commenced in calfhood. He should be handled firmly but always kindly. He can be led and coaxed but seldom driven. Never arouse his combative-ness, nor speak in any but a kind tone to him.

Control him but do not let know it. Never caress him; never allow him to his good disposition; never allow him to get the least advantage; never handle him if you fear him. You may suppose that he is not aware of your fear. You are mistaken. Never quarrel with him nor beat him. Make him know his place and keep it. I do not mean to be understood that should be refractory he is not to be punished; he must be controlled. As far as possible avoid changing grounds. Give him daily exercise of some kind. Regarding the feed of the bull it should always be sufficient to keep it in a good health condition but never fat. If he should incline to take on too much of flesh, lessen his grain ration, which in no case should be large. It has sometimes occurred that grain can be withdrawn almost entirely for months. The grain should be corn, oats, wheat, bran and rye meal in about equal proportions. Roots and corn ensilage for a change where they can be procured. Keep him groomed as you would a race horse. Always water frequently and not in large quantities. If he has access to water constantly there is no danger, but many bulls have been ruined by drinking excessively.

In conclusion, on breeding or selecting a bull, look well to him as an individual and to his ancestors. His dam first must be capable of making a large quantity of butter on fair feeding. Let the animals in his pedigree be both performing and producing animals. Let his sire be the sire of tested cows. Without the exercise of this oversight, barring a miracle you will be doomed to disappointment. The inevitable law that like produces like must mainly govern the breeder in the selection of his breeding animals. The next thing is culling. This can not be overlooked. Remove from the herd all inferior animals.

Feed.—The natural food of the calf is the milk of the dam. This it should have pure at first, with an increase of skim milk gradually increased for two months, when it can be fed skim milk with a ground grain mixture made into gruel and warmed to blood-heat winter or summer, until it is six months old, when all milk should be taken away. The calf should have access to good clover hay from the first. Its feed from this time should be such as will maintain thrifty growth and not tend to fat; it would be a great mistake to fatten any animal produced for dairy purposes. The power to consume, digest and assimilate nutritious food is what is desired of the cow at maturity. In order to accomplish this the calf should be fed such food as would task the digestive organs enough to secure a strong digestive apparatus. Coarse food and plenty of it with a small grain ration should constitute its diet. In this manner it should be kept until it is about fifteen months old, when if a heifer, it may be bred. This gives the heifer sufficient time for growth before coming to duty in the dairy. When the young cow has dropped her calf and recovered her normal condition, richer foods should be given her. These should be increased very gradually for at least three months, when the quantity that she can digest and assimilate

safely should be reached. Always resort to more or less change of diet. No animal needs it more than the cow giving milk. Change of food is necessary for the health of the cow. No animal can be kept in good condition without this change of food.

The feeding of the cow will largely depend on what she is kept for; if for stock, she will not need so much nor so rich food as though kept for the dairy alone. No one must expect exact rules for feeding, as much depends upon the animal. The milk cow and the growing heifer must be fed a ration suitable for the requirements of each. The cow must have that proportion of protein, carbohydrates and fat suited to the highest productiveness of milk and butter and the proper development of the foetal calf. There is no place where experience is more needed than in feeding. It is true that while many know the great importance in regularity in feeding, it is seldom practiced.

The shelter provided at all times should be ample, convenient and suited to the stock. Warm, dry stables are indispensable. They should also be well lighted and properly ventilated as these promote health.

Allow me to say in conclusion that the "Little Queen" has actually won her way to eminence. She stands today without a peer as a producer of butter on moderate rations. Future laurels will deck her crown when the result becomes known at the great butter test of 1893.

## THE NATIVE FOREST TREES OF OHIO.

The Professor of Botany of the Ohio State University Completes the Exhibit For the World's Fair—A Fine Display of Woods, Viewed by Hundreds of Visitors Before Its Departure for Chicago.

The preparation of the forestry exhibit of the state of Ohio, was placed by the board of the World's fair managers, in the hands of Prof. W. A. Kellerman, who has during the past ten or twelve months devoted all his vacation time to the undertaking. The work has been finally completed and the specimens are on their way to Chicago. They will be in place on the day of the opening of the fair.

Before the goods were boxed up the people of Columbus had an opportunity of seeing them displayed in the botanical lecture-room. Hundreds of visitors inspected the exhibit, and the universal verdict was that Ohio has woods that can not be excelled by any state in the union for variety, beauty and utility.

The exhibit includes all the native species or kinds, numbering eighty-five. Each is shown by specimens of the leaves, twigs, the flowers, the fruit, the bark of trunk and limbs, and the wood in three forms, viz: a cross section of the trunk, a piece of the wood split from the trunk, and a highly polished board, the latter being twelve inches wide and eighteen inches long. All these parts are attached to a heavy pine board fifteen inches wide and four feet and a quarter long. The label gives the common English name printed in plain black type and the botanical name in small type.

The specimens will be arranged in their botanical order, thus bringing closely related trees together for easy comparison. That is, the maples will be side by side, the oaks will be together and closely related genera next to them, and so on for all the groups. The largest number of species in any one genera is that of the oaks. Of these there are thirteen species as follows: bur oak, white oak, iron oak, white swamp oak, chestnut oak, yellow oak, pin oak, black oak, scarlet oak, black jack, red oak, laurel oak and leaf oak. The hickories include six kinds: shell bark, big shell bark, black hickory, white hickory (small fruited hickory), pignut and butternut. Three pines occur in the state; namely, white, pitch and Jersey pines.

Several of the woods which possess good qualities are yet not in general use. Foremost among these is the Kentucky coffee tree, that works so easily and has such a conspicuous yet beautiful grain. For cabinet work and inside finish it should take a high rank. The high polish of which the wood of some of these smaller trees is susceptible, is very striking. For example, two or three species of the sumach. Even the pawpaw makes a good showing, as does also the sassafras and several of the hawthorns. Perhaps the box elder was the greatest surprise to the interested visitors who examined the specimens. Few if any knew that it possessed such a handsome grain and that it was capable of so high polish. (Others can with good reason entertain a high opinion of the forest products of the state, after seeing this collection.)

Besides the above complete illustration of all the kinds of trees, a special exhibit is made of woods, mostly in the form of veneers,—that show a fine grain, particularly those useful for cabinet work. It includes five to eight samples of walnut, ash, maple, oak and hickory and one or two specimens of kinds not generally used in cabinet work. They are all highly polished, the samples being ten by eighteen inches.

The exhibit includes also the medicinal roots, barks and herbs that grow in the state—one hundred in number. These are mounted on cardboard eleven by fifteen inches and framed in oak. The crude drug or part used is shown in the form found in commerce and by the side is placed the specimen of the plant from which the same is obtained. People who know bonset, ginseng, horhound, lycopodium, etc., as sold by the druggist, can here see those plants in their natural condition. They may perchance find near their own doors many of the plants that are valuable in medicine.

Prof. Kellerman was also commissioned to prepare the native flora of the state. He collected the flowering plants and ferns, also the mosses, the lichens, the fungi and the algae. The flowers are mounted on sheets of standard size used in herbariums, but all the others are framed and shown behind glass, being mounted on cardboard eighteen by twenty-two inches. The collection is highly instructive and very attractive.

The flowers are mounted on sheets of standard size used in herbariums, but all the others are framed and shown behind glass, being mounted on cardboard eighteen by twenty-two inches. The collection is highly instructive and very attractive.

Prof. Kellerman was also commissioned to prepare the native flora of the state. He collected the flowering plants and ferns, also the mosses, the lichens, the fungi and the algae. The flowers are mounted on sheets of standard size used in herbariums, but all the others are framed and shown behind glass, being mounted on cardboard eighteen by twenty-two inches. The collection is highly instructive and very attractive.
